# REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 15. THE REDCLIFF REVIEW, THURSDAY, APRIL 1, 1926.

APR 3 1926

## REDCLIFF MEMBER WRITES ABOUT FACTORY ACT

**Explains How the Amended Act Now Stands**

Edmonton, March 29, 1926.

Editor Redcliff Review,
Redcliff.

Dear Sir:

I have had for some time letters from industries of Redcliff in relation to the "Factory Act," and I would appreciate the privilege of answering them through your paper. I have at all times given this my most earnest consideration with reference to the rights of both employers and employees. The Act is not now being in effect and providing for a ten-hour day. Also an eight-hour day has been in effect for miners.

I am enclosing the part to which objection was made:

"The hours of labour for any person employed in a factory, shop, office or office building shall not exceed nine in the day and fifty-four in one week:

"Provided, however, that the inspector may in individual cases permit employment for a longer period for reasons of occupation, trade, accident or other necessity."

The last paragraph above was amended to read:

"Provided further that the Lieutenant-governor in council may appoint a commission of three persons to consider the question of the early establishment of a forty-eight hour working week, and such commission shall inquire into and draw up a report as to the advisability of the establishment of a 48-hour week with regard to any or all industries carried on in a factory, shop, office or office building, and such report shall be laid upon the table of the Legislative Assembly at the Session next held after the passing of this Act.

This has passed the committee of the whole house. It puts into effect the 8-hour day. However, you will notice that in this it is provided that "the inspector may in individual cases permit employment for a longer period for reason of occupation, trade, accident or other necessity."

In the committee the minister said that brick yards would be considered as seasonal occupations, likewise others, such as sawmills, sugar factories and cement works, in the same class. It would also be difficult in those industries with reference to that trade, in neighboring countries as well, where that trade came into competition with other trades.

Now, as to the eight-hour day, you will observe, no commission will be appointed to go into the whole question and report to the next session of the house. Thus all industries affected will have ample opportunity to prevent a week's work before this commission and any change cannot come into effect without sanction of this legislature.

I have endeavored briefly to lay the facts before you and it seems to me both employers and employees are receiving due consideration.

I am, yours truly,

W. C. SMITH.

## Ranchers of District Form an Association

**For the Purpose of Bringing Buyers and Sellers Together**

At a meeting of horse breeders of the district held in Medicine Hat last Thursday, it was decided to organize an association which will be known as Medicine Hat and District Horse-breeders' Association.

The following officers were elected:

President—H. N. Caven, Dunmore.
Vice-Pres.—T. H. Hall.
Sec.-Treas.—W. D. Watson.
Directors—T. H. Toney, Medicine Hat; J. Scott, Redcliff; H. N. Caven, Dunmore; J. Mitchell, Medicine Hat; R. Harding, Redcliff; J. Hargrave Welsh; F. Walker, Box Springs; D. McKeen, Redcliff; W. Clarke, Little Plume; J. English, Plume; F. Kraft, Foran; J. Weiss, Robinson.

The object in forming the association is for the purpose of bringing buyers and sellers together, explained Mr. Caven, in opening the meeting. At present, he said, the buyer had some difficulty in finding out the horses they desired to purchase and the sellers did not know when buyers were in town looking for the sort of horses they had to sell. For this reason, was thought desirable to form an organization with an office in the city where a list of horses for sale in the district could be kept for the information of buyers.

**ALBERTA HAS MILDEST WINTER IN 48 YEARS**

According to the report from the Dominion Meteorological Service at Toronto, Alberta has experienced the mildest winter in 48 years. This record show that at Edmonton the mean temperature for the months of December, January and February was 2 above, compared with a normal of 15 above. At Calgary the mean temperature in these three months was 20 above, compared with a normal of 15 above, and at other points in the province the weather was correspondingly mild. At Calgary only two days in the three months showed below zero temperature, and as a matter record was shown at Edmonton, whereas in the Peace River district in the north, and in the extreme southern part of the province even milder weather prevailed.

## Robt. Louden Talks Of Early Experiences

**Drove Raft of Lumber Down River To Saskatoon 43 Years Ago**

When one's birthdays roll around, especially if one is getting up in years, one naturally remains allowing his mind to wander back over days gone by. This is the case with one of our townsmen, Robt. Louden, celebrates his birthday anniversary tomorrow.

In announcing his anniversary to the Review the other day, Mr. Louden remarked, "how time flies," and then proceeded to reminisce some of his early experiences when he first started in this very district forty-three years ago, a stirring young Scotch lad just fresh from the land of the heather. His first experience in this new, and at that time barren land, was no interesting, and gives such a good idea of the hardships of pioneering existence that we print some of it herewith.

Landing in Medicine Hat in the fall of 1883, Mr. Louden took the first job that was offering, that of one of the first drift in the old coal mine across the river. He worked all winter and after the mine was closed he took the contract to run a raft of lumber down the river from Medicine Hat to Saskatoon for the Temperance Colonization Co. It was thought the trip could be made in a couple of days, but the vagaries of pioneer navigation that was a good deal longer.

Landing in Medicine hat in the fall of 1883, Mr. Louden took the first job that was offering, that of one of the first drift in the old coal mine across the river. He worked all winter and after the mine was closed he took the contract to run a raft of lumber down the river from Medicine Hat to Saskatoon for the Temperance Colonization Co. It was thought the trip could be made in a couple of days, but the vagaries of pioneer navigation that was a good deal longer.

At that time there was very little settlement to be observed in the entire journey and the matter of getting provisions was some problem. At one time the crew on the raft were on Saskatoon berries for several days. At another point on the river, west of Swift Current, Bob left the raft and walked into that town for provisions. He met, on this trip, three lost track of the days of the week and did not know it was Sunday. However, Bob located the storekeeper at a church service being held in the station, and when he got back to the raft, the company were almost starved to death. After getting provisions aboard here they made good at a point 75 miles north of Moose Jaw where signs of habitation were noticed along the river bank. Here a swing post with what looked like a letter box on top of it. On a post was also used for freighting between Saskatoon and Moose Jaw. Mr. Louden went to the box to investigate and to his surprise on looking into the box found a letter addressed to himself. This was the colonization company official who was getting almost for the men on the raft. Bob left an answer asking for more provisions and when the raft came down the river they were overtaken by a man with a boat load of meat and groceries. So far as safe navigation went, this new addition to their stock lasted them till they got to Saskatoon but they were in a pitiable state of clothing by this time, at their clothes were either worn out or had blown off the raft when hung out to dry.

The raft finally t ed up at a point 18 miles west of Saskatoon, known as the White Cap Reserve. Here again Bob went on foot after dark into Saskatoon where some of the boys were awaiting the long looked for raft. What citizens there were there at that time gave him and his crew a big reception. They were not long in reselling up some clothing, a few stoves and a buckboard after which the young mariner was driven back to his companions on the raft.

This ended the thrilling experience of a young Scotch lad who is now one of the pioneers of this province and who tomorrow is celebrating the anniversary of his birth.

After completing the contract to deliver the raft of lumber at Saskatoon Mr. Louden returned to these parts and took up a homestead on the spot on which the town of Redcliff is now located. Many happy returns of the day, Mr. Louden.

## Prince of Wales Shown in Movies

**On His Official Tour of Africa and South America**

The official picture of the Prince of Wales' tour of Africa and South America will be shown at the Monarch theatre, Medicine Hat, on Tuesday, Friday and Saturday evenings of this week. This is said to be one of the best pictures on the road this season. It gives a splendid view of the visit of the Prince to this corner of the Empire.

Savages that civilized people have never yet seen—native dans ng girls —The full war strength of the Zulus in a dance that shakes with fear—Monster Durbars—All the potentates of the jungle exactly as they were. These are all shown in the picture. Don't miss seeing it.

**SCHOOL MONEY INCLUDED IN RESOURCES DEAL**

The transfer of crown lands to the province of Alberta will mean that 758,000 acres, it was stated in the house of commons last Monday, in answer to a question. Of these 6,395,718 acres are school lands. The value of the lands cannot be accurately estimated at present, because of its unsurveyed territory.

The school land fund to be transferred to the province under the agreement stood on March 1 last at $7,386,779. An amount of $6,543,184 has been paid already.

## St. Ambrose S. S. To Give Operetta

**In Cameo Theatre on Wednesday, April 14th**

St. Ambrose Sunday School will put on an operetta in Cameo theatre on Wednesday evening, April 14th. The title to the operetta is "King Winter's Return." It depicts the coming of Queen Summer and her train who get imprisoned in icecaves by old Snowbound and Frosty. The scene is laid in King Winter's palace in the north pole.

The operetta is put on by the girls and boys of the Sunday school who have been devoting considerable time to its preparation, so that we feel sure a good evening's entertainment is assured.

Special scenery is being provided for the occasion by Walter Summerford. About 50 children make up the cast of characters.

Admission, adults, 50; children, 25c. Programs are being printed and will be issued. These programs will admit holders to the operetta. Be sure and secure one when the canvassers call on you.

## Silent Drama Speaks When Griffith Directs

**Veteran Producer Achieves Realistic Results After Exhausting Rehearsals**

Silence is the one thing missing from the most drama when D. W. Griffith is making a picture.

It becomes articulate it screams, it shouts, it augers, it cross-fires drama in the broadest sense of the word, and it can be heard. Hard-boiled executives become so absorbed at times they forget to turn their spotlights.

Scenes are repeated hour after hour. Instead of becoming boring they become hypnotic. The tremolo organ, the laugher or tears become contagious. And when the portrayals are finished they remain vivid as photographed. Sequences are shot in so scenes and the film record of the drama made while one player is actually living the roles they are interpreting. It is exhausting work, but it has been used by D. W. Griffith productions is built upon the results.

Curiously enough, Mr. Griffith does not seem to help the players achieve the proper mood. Emotion can't be stimulated artificially, he believes; it cannot be left to chance. He tries to let the player actually in the character he or she is portraying.

"That Royle Girl" is a stirring melodrama laid against the glittering yet sordid background of the Great Northwest and jazz zone. Carol Dempster, W. C. Fields, James Kirkwood and Harrison Ford are the principal players.

This picture will be shown at the Cameo theatre next Thursday evening.

**ALBERTA INSTITUTIONS ARE WELL HANDLED**

The voluntary, visiting committee appointed some time ago by Hon. Geo. Hoadley, minister of health, to visit the various public institutions in the province, made its report to the legislature last week. Generally speaking, the committee had high praise for the manner in which the asylums and gaols were handled. Certain suggestions for improvement were made, at various points.

**MINISTER OF LABOR IS ELECTED IN MIDDLESEX**

Obtaining majorities in practically every subdivision in West Middlesex, J. C. Elliott, recently appointed minister of labor in the administration of Mackenzie King, was returned last Monday in the by-election rendered necessary by his promotion to the cabinet, by a majority of 2,781 votes over his Conservative opponent, T. A. Elliot. The minister of labor polled 6,520 votes compared with 3,859 by the Conservative candidate.

**HENRY D. KITCHEN**

## *Doings In The Legislature For The Past Week*

(Supplied by John McKenzie)

During the past week the Alberta House has been working at high pressure with a view to cleaning up the business on hand by Easter. There is a possibility that another short session will be held after Easter, if the Dominion makes any change in the agreement re Natural Resources, and had the rural credit bill in shape.

**Budget Agreed to**

It hall been expected that the budget debate would open on Monday with the address of the leader of the opposition, J. C. Bowen, would continue on Tuesday, but it did not. On Monday evening, after one other Liberal, W. T. Henry, had spoken, and four Farmer members had replied to Mr. Bowen's criticisms,

Other Liberals had been expected to speak, and Premier Brownee was to have wound up the debate, but the Liberals showed no inclination to go on, and the Premier was out of the house that evening. There was no amendment, and no dissent when the budget motion was put. This is considered extraordinary, particularly in a pre-election session.

**Urges Inspection of Immigrants**

Referring to immigration, Mr. Hoadley argued for a proper medical inspection in Europe. The people now conducting the examination were shipping and transportation officials whose idea of qualifications for immigrants seemed to be the ability to pay the fare and walk aboard the ship. More than half the people of Alberta asylums and hospitals were foreign born, but it was next impossible to deport them, because they were destitute.

## Refer 8-Hour Day To a Commission

**Report to be Laid Before the Legislature at Next Session**

An amendment providing for the appointment of a commission to consider the questions involved in the establishment of a 48-hour working week, and this amendment to the legislation, was introduced by Alex. Ross, minister of Labor, when the Legislature was considering the factory act in committee Monday afternoon. The clause provided that after May 1, 1926, the lieutenant-governor in-council may by proclamation declare that the hours of labor of persons employed in a factory, shop, office or building shall not exceed 48 in a week, and that the act as at present following substituted:

"Provided further that the lieutenant-governor-in-council shall after the coming into force of this act appoint a commission of three persons to consider the questions involved in the establishment of a 48-hour week for all or any industries carried on in a factory, shop, office or office building, and such commission shall inquire into and draw up a report as to the advisability of the establishment of the same with regard to any or all industries carried on in a factory, shop, office or office building, and such report shall be laid upon the table of the Legislative Assembly at the session next held after the passing of this act."

**TOMORROW A HOLIDAY**

As tomorrow will be Good Friday, and observed as a public holiday throughout Canada, all stores and offices will be closed for business for this day.

**HAIL INSURANCE BOARD HAS EXTRA GOOD YEAR**

The municipal hail insurance board of the province announces a reserve of over $700,000, with the statement that no financial condition is better than for some time. The total risk carried last year was $10,886,000, and the loss awards of the season amounted to $686,000.

The final figures for the revenue from game and fur taken in the province during 1925, made available from the office of the Game Commissioner of the Alberta Department of Agriculture, show that the total revenue was about $2,500,000, instead of $1,500,000 as first estimated.

## Local Footballers Elect New Officers

**Also Arrange for Friendly Game for Good Friday**

At a meeting of local football enthusiasts held last week, it was decided to organize for the season. The following officers were elected:

President—R. S. Hodge.
Vice-Pres.—A. N. Collard.
Sec.-Treas.—H. J. Cox.
Ex. Com.—J. Bevan, T. Balmer, F. Broughton, W. Campeau, D. Kerr, G. Thomson, R. J. Osgood.

The report of the committee which attended the general meeting, was presented and adopted. It was also decided not to enter the Medicine Hat district league until recognition had been given to the 1925 league winners.

Arrangements have been made to play a friendly game with the Calling on Good Friday afternoon.

The annual match this season with a small bank account of $9.50 left over from last season.

**GORDON MEMORIAL UNITED CHURCH**

Last week the C.G.I.T. groups received from the provincial office the honor pennant in recognition of the progra which has been carried out planned and organization a year ago.

On Tuesday evening Principal King spoke to the C.G.I.T. groups giving a fine information at the Girl Guides in France. Mr. King's address was much appreciated.

On Friday evening, following the Pre-Communion service, the Pageant Play, illustrated by sixty beautiful slides, constructed from photographs taken of the scenes and actors at Oberammagon will be presented.

## Here and There

The Mills, driving Brewster's famous Russian wolf hounds, won the Strongheart Trophy in the 60-mile race for Derby dogs at the Banff Winter Carnival and soon after left to enter the American Dog Derby races which were held at Ashton, Idaho.

Five thousand settlers are in sight for Canada this year under the Land Settlement scheme, according to Major John Barnett, Chairman of the Soldier Settlement Board of Winnipeg. "The majority will come from Great Britain and will be prepared to take root in Canadian soil," Major Barlett said.

Word has been received at Canadian Pacific headquarters of the death of James McGown, Superintendent Engineer of British Columbia coast services. Mr. McGown was born in 1863 and entered the service of the Canadian Pacific steamships in 1891 as fourth engineer. He brought over the Canadian Pacific steamer Empress of Japan from Glasgow to Vancouver last year.

An indication that big fish are migrating from the waters around Florida and Mexico to New Zealand is forecast in a special cable received recently. Zane Grey, the famous American writer, who is in New Zealand at present, caught the world's record swordfish recently. The monster weighs six hundred and eighty-five pounds and is large in proportion.

Stricken sick suddenly, Mrs. Charles Burns, wife of the president of the Carling Brewing and Malting Company, London, Ont., telephoned her husband at Jefferson City, Mo. They are not going to the judge to be sentenced for intractions of the peace, but simply because Mrs. Burns, being from a dry province, wants to be shown whether it is true, as alleged, that the best Indian game cocks can only be got from Yorkshire.

Tom, Dick, Jerry and Harry, four born fighters from the fighting county of Yorkshire, England, arrived in Montreal recently on their way to Mr. Jack Greeve, United States Supreme Court justice at Jefferson City, Mo. They are not going to the judge to be sentenced for intractions of the peace, but simply because Mrs. Burns, being from a dry province, wants to be shown whether it is true, as alleged, that the best Indian game cocks can only be got from Yorkshire.

## JOE JACOBSON WINS IN THE BOXING FINALS

**All Redcliff Boys Make Good Showing at Edmonton**

The Alberta Amateur boxing finals held in Edmonton this week Redcliff was represent by four knights of the gloves. Those were Jim Pedesta, Alex Kerr, Joe Jacobson and Ernie Podesta.

Joe Jacobson was the only one who won his bout although all the others made a good showing. Joe was up against Lacasse of Bonnyville in the 145 pound special class. The report says that after an indifferent start, Joe started to take the measure of his opponent and made a very creditable match. The bout is said to have given the fans quite a treat.

In the 160 pound class, Jim Podesta had the misfortune to break his thumb in the first round and was unable to continue the fight.

Jim Kerr met Ivy, a clair of Edmonton in the 126 pound class. Adair won the decision because of his aggressiveness but the decision is said to be needed all he had to face the decision by a narrow margin. According to accounts Section didn't have much on the Redcliff boy. One report says that the fans did not approve of the decision and thought Ernie should have won.

All around a good showing Redcliff boys put up a good showing. They all returned home last evening and with the exception of Jim Podesta's broken thumb none are feeling any the worse.

## Famous Hypnotist In Hat This Week

**Will be at the Empress on Thursday Friday and Saturday**

Dr. Paris, the famous hypnotist, will perform one of his wonderful feats at his engagement in the Empress theatre on Thursday, Friday and Saturday of this week, in Medicine Hat. He is said to be the greatest performer in this line on the stage today. On Saturday afternoon he will give a special matinee when he will demonstrate some special experiments that will appeal to both old and young.

## Legislature Will Not Close This Week

**Will Probably Meet Later to Consider Resources Bill**

According to an announcement made by Premier Brownlee in the legislature Tuesday, the government hopes to dispose of all business of the session before this week, with the exception of the report of the redistribution committee and the statement of the government of the northern railways question. So that the full-est discuss on may be given to these two important matters, the government hopes to clear away all bills and routine business before the holiday adjournment. If this can be accomplished before Good Friday there will be no session on that holiday, but they will meet again on Easter Monday. Wether the house will prorogue or merely adjourn to meet again to pass the natural resources transfer bill has not yet been decided. But the main business of the present session will certainly be completed by the end of the first week in April.

**250 MORE BRITISHERS ARRIVE IN WINNIPEG**

The second immigrants' special this week over the Canadian National lines arrived in Winnipeg yesterday with 250 passengers from the S.S. Orduna. Six C.N.R. special trains are required to carry the total of this week's immigrant contingent which arrived during the week-end from admiteal to Winnipeg. Many of these are destined for the colonization department official ste destinations in the west.

By 8:30 this morning 3000 settlers, including several hundred Britishers will have swept through over the Canadian National lines.

Yesterday's arr vals included three European bride-to-be, who will be met by their prospective husbands at their final destination and will immediately take up their duties as prairie housewives.

**SAYS GOVT. TO ALLOW ON ROAD ALLOWANCES**

The Alberta government is contemplating dropping of the right to drill on road allowances in all the old fields in the province, to one large company, according to an article in this morning's Albertan. The group which is angling for these highly value rights is said to consist of some of the most prominent financial men in Alberta, whose application, it is said, is being given considerable favorable consideration.

Credence is lent to this report by the history of an application filed on May 14, 1925, by W. C. Fisher, a Calgary barrister, acting for a syndicate of prominent Calgarians, to cover a number of road allowances in the Turner Valley.

Make no other date for Wednesday, April 14th. That's the date of St. Ambrose S. S. Operetta.

**RED ROSE TEA**

**"is good tea"**

*Red Rose Orange Pekoe is extra good. Won't you try it this time?*

## Canada's "Inferiority Complex"

A prominent Canadian, addressing a meeting in New York recently, deplored the "inferiority complex" of the people of the Dominion—in other words, the national tendency to detract from the progress and achievements of Canada, to belittle its growth, and question its possibilities. Too many people in Canada are found who constantly compare a given set of conditions, or services, in this country with the much more populous and wealthy United States, or the older established countries of Europe. It is no doubt well that Canada should set a high standard of comparison for their country, rather than a low one, but it is hardly fair to place in contrast a country of ten million people with one of one hundred and ten million people.

Canadians are declared to be "slow but sure and reliable." We believe that the people of this Dominion have justly established for themselves the reputation of reliability. We may lack the dash, the enthusiasms, the boast-fulness of our neighbors to the south, and no doubt it would be to our advantage if some of their enthusiasm and energy were injected into our national make-up. Our southern neighbors would probably be better off with a little less of such national characteristics just as Canadians would be better off with a little more.

The year of 1926 would appear to be an excellent one in which to develop more of the spirit of national self-confidence in Canada. Following the splendid crop returns of last Fall, the new year opened with expanding bust ness in almost every direction, and the making of plans for large and important advancements in practically every branch of industrial and commercial activity during the year. The financial health of the Dominion is better than at any period since before the war, unemployment is less, and an optimistic tone prevails. This should be the normal state of affairs in this country, and it can be maintained if the people of Canada unitedly determine that it shall be maintained.

Canada's wheat crop last year was the second largest in its history and more than 150,000,000 bushels greater than in 1924; the oats crop was greater by nearly than 100,000,000 bushels; barley by 26,000,000 bushels. The ports of Montreal and Vancouver established new high records for the export of grain. Dairy production in the three prairie provinces, which was below 6,000,000 pounds fifteen years ago, exceeded 50,000,000 pounds last year. Foreign trade is expanding rapidly, and the favorable balance of exports over imports now reaches to almost $300,000,000.

In the face of such official figures, why should any Canadian feel called upon to apologize for his country, or to doubt its future? There has been talk of hard times in Canada, and unquestionably some recent years have been trying and difficult, but such conditions have existed in most countries. Not long ago that student of world affairs, Sir Clifford Sifton, stated with absolute conviction that man for man no country in the world was better off than Canada, and in no country did there exist better opportunities for the man or woman willing and eager to work.

The year is yet young, but already in different sections of the country contracts for more new building have been let than is usually the case by mid-summer, and announcement of new and large undertakings is now the order of the day. Only recently one of the largest groups in England announced the placing of an order in Canada for 20,000,000 feet of British Columbia Douglas fir for railway ties, an order which exceeds in quantity the whole of British Columbia's export to the United Kingdom two years ago. The Admiralty has decided to use Douglas fir for the decks and hatch-covers of battleships, and the Admiralty Board has found the same material for its motor boats and lifeboats. In two years British Columbia's export of timber has risen from 16,000,000 feet to 60,000,000 feet in 1925.

These facts are cited, not in a spirit of boastfulness, but as concrete evidence, as substantial reasons, why Canadians should altogether abandon that "inferiority complex" for which they are criticized and which does not to regard the development of the Dominion and to create a lack of confidence, and a self-depreciation, which is inimical to the welfare of Canada. Let us see this weakness in our national make-up buried forever.

### Canada's Trade Grows

**Trade Within the Empire Shows Heavy Increase**

Canada's active participation in trade and commerce within the empire is revealed in the trade statement for the year 1925, issued by the bureau of statistics. In both imports and exports, Canada has increased her business with the rest of the empire. The imports from other nations were $197,000,000 in 1923, $190,000,000 in 1924 and $204,000,000 in 1925. In the same three years exports to British possessions were $155,000,000 in 1923, $145,000,000 in 1924 and the new peak of $207,000,000 last year.

Many a man has lost a lot of money through the hole in the top of his pocket.

### Where Liquor Money Goes

**More Money Spent On Liquor In Alberta Last Year Went to Ottawa Than to Provincial Treasury**

More money spent on liquor in Alberta last year went to Ottawa than remained for Alberta's own treasury, according to the report of the liquor board now submitted to the government. Over $2,123,000 was paid to the Dominion Government in 1925, representing customs and excise duties on liquor and spirits, taxes on beer, excise on malt, and sales taxes on the various products sold.

No reduction in the duty charged by the Dominion Government was made during the year, and there is little prospect, says the report of any material lowering of present retail prices until such reduction is given effect.

Genuine

BAYER ASPIRIN

Proved safe by millions and prescribed by physicians for

Colds Headache Neuritis Lumbago

Pain Neuralgia Toothache Rheumatism

DOES NOT AFFECT THE HEART

Safe

Accept only "Bayer" package which contains proven directions.

Handy "Bayer" boxes of 12 tablets

Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid. (Acetyl Salicylic Acid. "A. S. A.")—While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Farbenfabriken of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

### Alberta Oil Development

**Royalite Company Now Producing Five Hundred Barrels Daily**

After spending more than four million dollars in exploration work, the Imperial Oil Co., Ltd., has at last obtained a crude oil supply in Canada. It was reported by President, C. O. Stillman at the recent annual meeting of the company in Toronto. In his address to the shareholders, Mr. Stillman said one well in Alberta operated by the Royalite Oil Company, a subsidiary of the Imperial, was now producing 500 barrels daily and showed no signs of diminishing. More wells, he said, were being drilled by the Royalite Company in Turner Valley, Alberta, in which district the company was hoping for greater success. The company was also delivering about 14,000,000 feet of gas daily to Calgary.

**"DIAMOND DYE" ANY GARMENT, DRAPERY**

Just Dip in Tint or Boil to Dye

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades or dye rich, permanent colors in lingerie, ribbons, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings —everything!

Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

Powdered coal is converted into liquid fuel by heating to a high temperature in an atmosphere of hydrogen under great pressure.

**HER IMPROVEMENT WAS REMARKABLE**

Weak and Run-Down—Restored by Dr. Williams' Pink Pills

"Two years ago," says Mrs. L. Wright, Moreton, Sask., "I was very much run-down in health. I suffered from indigestion, sick headaches and sleepless nights. Pains would often come over me and I would have to lie down till the faintness passed away. I was so short of breath that I could not walk any distance or do anything that required much exertion, without feeling completely tired out. As I was constantly growing weaker, I consulted a doctor who told me I was anaemic and needed building up. He took several bottles of tonic medicine, but the help I got from it was only temporary. At this stage I decided to try Dr. Williams' Pink Pills, which I had used in my family with much benefit. It was not long after I began using them that I knew I had at last found the right medicine. I think I took altogether some fifteen boxes, and the improvement was remarkable as I was feeling as well as ever I had been, and my good health has continued to this day. I had also been troubled at times with rheumatism, and this as well as my other troubles disappeared. I have very much recommended Dr. Williams' Pink Pills to neighbors who have used them with equally good results."

All weak, anaemic women and girls should follow the example of Mrs. Wright, and give these pills a fair trial. New health and new strength is sure to follow. You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Turkish Women Enter Industrial World

**Over Twenty Thousand Have Found Employment in Last Four Years**

There was not one Turkish woman among the industrial workers of Constantinople four years ago but now there are more than 20,000. A Turkish lady tobacco conoern, the Duahan Society, led women into industry when it opened a factory in 1921 with the employment of 250 Turkish girls.

Turkish women have proved so adept at the sorting and grading of tobacco leaves that now this society employs 6,000 women. Other companies have sprung up and increased female employment. Comfort and health of the workers has been insured.

**Cattle Killed By Wolves**

During the past year, 10,000 cows, horses and sheep were killed by wolves in the Akmolinsk district, entailing a loss of $250,000. Special detachments of local huntsmen and troops are trying to destroy the beasts.

**Will Produce Artificial Silk**

Artificial silk to the extent of ten tons a day will be produced by a Japanese firm of manufacturers. Erection of the factory which will operate according to the new process is being hurried forward.

### China's Request Refused

**British Authorities Would Not Allow Canadian Officers to Train Troops**

The refusal by the British authorities in China to allow Sun Yat Sen, president of the Chinese Republic, to engage Canadian officers to train his troops, was responsible for the entry of Soviet troops into Canton, to the great ultimate disadvantage of British traders, states the special correspondent of the London Morning Post in Southern China.

This is not the first time that Canadians have been said to have played a prominent part in the destinies of China. Some years ago the report was broadcast that Morris A. Cohen, young soldier of fortune from Edmonton, had become the confidential advisor of Sun Yat Sen, after having acquired intimate acquaintance with Chinese characteristics while he was still in Canada, observing the Chinatown of Edmonton.

**The Family Remedy For Over Forty Years**

**So Says British Columbia Lady of Dodd's Kidney Pills**

Mrs. E. Callier Suffered From Pains in her Back and is Now Completely Relieved.

Vancouver, B.C.—(Special)—"I can truthfully recommend Dodd's Kidney Pills," so states Mrs. E. Callier, 917 11th Avenue East, in an interview. "I was doubled up with pains in my back, but after taking Dodd's Kidney Pills I have not felt a pain in two years. My father always kept them in the house, and I found relief in Dodd's, as I always felt relieved after taking them. We have used Dodd's Kidney Pills in my family for over 40 years. I have Dodd's Kidney Pills will do others as much good as they have done our family."

Statements like this have built up and maintained the reputation Dodd's Kidney Pills hold today.

You will find that Dodd's Kidney Pills will relieve kidney trouble, no matter where or in what form it is found.

### Donation From Indian Ruler

Impressed by the Armistice Day services, the Begum of Bhopal has sent a donation of $50,000 to the British Legion appeal fund. Her two small grandchildren also sealed the fund by selling poppies in the streets.

### The Stamp of Learning

"Pa, what's a post-graduate?"

"A fellow who graduates from one of those correspondence schools, I suppose."

### Reginald Frank Stone

—Batcliffe Studio

St. Catharines, Ont.—"During my first expectant period I was in very poor health, was very nervous, suffered from morning sickness, had backache and abdominal pains. I was so miserable as could be. Then a friend I learned of Dr. Pierce's Favorite Prescription, and after I began taking it I got along fine; it relieved me of the morning sickness, pains and distress from my back and, sides and I grew well and strong. Was able to do my own work the remainder of the time, experienced very little suffering and had a fine healthy baby, who has never had a day's sickness except slight colds. I was very glad to know of a medicine so valuable as the Prescription proved to be."—Mrs. Reginald Stone, 66 Haynes Ave. All dealers.

Send 10 cents to Dr. Pierce's Laboratory, Buffalo, N.Y., if you wish a trial package of tablets.

### Traffic Rules In Berlin

**Pedestrians Who Cross Street Outside Lines Are Fined**

In Berlin the whilhg line rule applies to pedestrians as well as to vehicles, and, according to "Safety First," the traffic police have now to report to headquarters every pedestrian who crosses the street outside the line.

The police corrects the offender on the spot. He gently leads him back to his starting-point, and makes him repeat the crossing, this time under the guidance of the law, and doubtless to the grinning delight of the onlookers.

People who resent such tender care find it pays to be quiet. Giving "back-chat" to a policeman is, in Berlin, even a worse offence than transgressing the line.

### Small Farms In France

**Owners of Few Acres Are Exempt From Taxation**

The French agricultural department has found that nearly four million of the 6,702,752 landowners in France possess less than 25 acres of ground each. Only 20,250 have more than 250 acres and less than 5,000 have more than 750 acres.

The small parcels into which French land has been cut up is given as one explanation of the statement that farmers pay little or no taxes. The small landowner profits from exemptions the same as owners of small businesses.

### Primitive Race Found In Africa

**Expedition Heard of Tribe Said to be Almost Inhuman**

An expedition from Denver, Colorado, which has just returned to Cape Town from the little known interior of the Kalahari Desert, brings vivid accounts of life among the peoples of the most primitive races in the world where there exist the largest herds of big game ever seen.

Members of the expedition heard of a lost, unknown tribe of bushmen who had been isolated hundreds of years. Their country is absolutely impenetrable from the west, owing to the rocky coast of the South Atlantic, while a desert 100 miles wide bars the eastern approach.

The tribe never has been seen by white men and invariably flee at the approach of other bushmen.

The bushmen are said to be stunted, almost inhuman, devouring ants, eggs, flying ants, mice, lizards, snakes and scorpions.

They usually dig the earth for food, while the men follow lions and try to steal their kill, or filch carrion from the vultures.

All kinds of big game were discovered during the Roosevelt even richer than East Africa. One hundred and fifty elephants were counted in one night around a water hole.

Children suffering from worms soon show the symptoms, and any mother can detect the presence of these parasites by the restless and fretting of the child. Until expelled and the system cleared of worms, the child cannot regain its health. Miller's Worm Powders are prompt and efficient, not only in expelling worms of course, but also as a toner up for children that are run down in consequence.

### Sell Prince of Wales' Checks

**Wealthy American's Purchase Them From Merchants For Souvenirs**

Agencies of the Prince of Wales, a weird habit has arisen of bartering the young man's checks. The Prince does not carry a fat wad about with him, and, when he makes a purchase, he frequently gives a check in payment. It seems that the clerk or manager of the place will sometimes retain the check, paying for the Prince's purchase in cash. Then the clerk is said to sell the money to some wealthy sycophant who, probably, frames it, and hangs it in his dining room. Oddly enough, "wealthy Americans" are said to be the most eager purchasers of these souvenirs. As the checks are never presented at his bank, the Prince thus benefits by the sale. Nevertheless, he is anything but pleased about it.

### Coals of Fire

People in the Maritimes are calling Sir Henry Thornton "a menace to Canada." And Sir Henry's response, observes the Kingston Whig, is a contract to purchase 132,000 tons of Nova Scotia coal for the C.N.R. That is his way of heaping coals of fire on the heads of his detractors.—Toronto Globe.

The most obstinate corns fail to resist Holloway's Corn Remover. Try it.

### Homes in Irrigation District

More than three hundred and seventy-five home units have been established in the Lethbridge Northern Irrigation Block in Southern Alberta since its inception a few years back.

**Minard's Liniment used by Veterinarians**

After Every Meal

**NABOB TEA**

*Tea as it should be*

**Record Baggage Handling**

**Checked Four Million Pieces of Luggage With Loss of Only Eleven Pieces**

Handling 4,000,000 pieces of baggage in a year with a loss of only 11 pieces, is the record established by the baggage department of the Canadian Pacific Railway western lines in 1925. There was also a decrease in the amount of claims of twenty-five per cent. from those of 1924, bringing the actual amount paid out to less than 500 dollars.

**France Growing More Wheat**

It is assumed that in a few years France will be producing enough wheat to take care of its requirements. At present the production is nearly 90,000,000 quintals more. A quintal is about 220 pounds. Most of the wheat grown in France, however, is of the soft variety, and it may have to import hard wheat for some time yet.

**Thoughtful Mothers**

**Self-Poisoning Takes Huge Toll**

**Many Fall in Life Through Sheer Neglect of Fundamental Rule of Health**

Thousands of men and women are to-day victims of their own neglect. Grouchy, listless, irritable, suffering from headaches and indigestion, they spend enormous sums in medicine without avail. They would give much to regain their old vitality.

Can it be done? Yes! How? Simply by recognizing the importance of one fundamental rule of health—the proper elimination of the bowel contents. Poisons that are allowed to remain in the system quickly lower the stamina, weaken the nerves and then pave the way to ill-health. Stop this self-poisoning by taking *Nujol*—the scientific lubricant that conquers the work of Nature's lubricant when, through modern living conditions, the natural supply fails.

*Nujol* can be taken indefinitely without injury to the system. Try *Nujol* to-day. Ask for it at your nearest drug store, but remember there is only one *Nujol*. Watch for the name "Nujol" in red on the label and package.

# Greater Industrial Development Shown Within Recent Years In The Western Provinces

Of recent years, and evidenced most markedly in 1925, there has been pronounced activity in Western Canada in the direction of achieving a greater industrial development, principally through the exploitation and utilization of the wealth and variety of the natural resources the area possesses. This broad territory is commonly regarded as being purely agricultural, dependent entirely upon the east and other countries for its manufactures, and whilst it is true that the great bulk of its revenue is derived from farming, with manufacturing a relatively unimportant phase of its economic life, there is, at the same time, a steady industrial expansion evident, and Western Canada is consistently coming to manufacture a larger share of its fabricated requirements.

The prairie provinces being so essentially agricultural, the manufactures from farm products are naturally the ones which have been developed first and most actively. In all three provinces flour and grist mills constitute the greatest industrial activity. Slaughtering and meat packing occupies second place in Alberta and Manitoba, but in Saskatchewan butter and cheese manufacture has second place, whilst it is third in both sister provinces. In British Columbia, resources differ drastically, and the magnificent woods of the province have made lumber its first activity and pulp and paper its second, with fish preserving at third place, with an almost equal importance. The other leading industries of the prairie provinces are cotton and jute bags, electric light and power, bread, biscuits and confectionery, coffee and spices, printing and publishing, sash, door and planing mills, malt liquors, aerated and mineral waters, and lumber, lath and shingles. British Columbia's fourth industry is electric light and power, followed by slaughtering and meat packing, fruit and vegetable canning, sheet metal products, sash, door and planing mills.

Vancouver has become the first industrial city of Western Canada with a production value of $71,221,305, followed closely by Winnipeg with a value of $70,647,927. Those two cities are outstanding, and Calgary, which occupies third place, has an annual manufacturing production value of only $18,171,249. St. Boniface, Regina, Edmonton and Victoria have each a production in excess of $10,000,000, and Moose Jaw, Saskatoon, Medicine Hat and New Westminster in excess of $5,000,000. Other important manufacturing cities are Brandon, Portage la Prairie, and The Pas in Manitoba, Prince Albert, North Battleford, Yorkton and Weyburn in Saskatchewan, Lethbridge and Radcliff in Alberta, and Fernie, Merritt, Merritt and Nanaimo in British Columbia.

Efforts towards industrial expansion in Western Canada have been very much more marked and become much wider in scope since the last survey was made by the government, and developments of a magnificent industrial nature have taken place. Beet sugar manufacture has been inaugurated in Alberta, and oil refining is steadily becoming a more important activity as the crude product is drawn from the Montana field, whilst more substantial results are confidently awaited in Alberta and Saskatchewan. In the same province the manufacture of cereal straw into paper pulp has almost reached the stage of actuality, and there would seem to be every probability that very soon the prairie sands of the Athabasca will be variously utilized. Sodium sulphate deposits in Saskatchewan have been put on a commercial basis and the product is being shipped east and south, whilst ceaseless effort continues in the matter of utilizing the province's resources of lignite. Altogether there is evident in Western Canada a very marked determination to expand industrially through the exploitation and development of the great wealth and variety of the natural resources of that area.

### Wheat Shipments to Vancouver

Exports of wheat from Alberta to Vancouver are expected to reach 50,000,000 bushels in the 1925 crop shipping season. The Canadian Pacific Railway is moving about 2,000,000 bushels a week to the Pacific coast.

### Her Incentive

Clergyman (to 4-year-old Nellie): And what do you go to Sunday School for, my dear?

Nellie: To see Tommy Jones.

Hewitt—He isn't much of a talker."

Jewett—No; compared with him an oyster is a linguist."

## Market For Canadian Coal

### Introduce Bill in House to Levy Duty On U. S. Coal

Agitation to hold Canadian markets for Canadian coal took a concrete form in the House of Commons when two bills were introduced asking that heavy duties be levied on all coal entering Canada from the United States.

With the tie-up in the American anthracite fields the manufacturers of the east have looked more and more to Alberta for fuel requirements, and it is predicted at Ottawa that the $7 rate for Alberta coal to Ontario will result in the complete capture of that market by the prairie mine owners.

Maritime members who have been disturbed over the unemployment in the coal fields of the east are also pressing for some action that will keep the Canadian market for Canadian mines and give work to Canadian workmen, and are supporting the proposed measures.

It is recognized, however, that the raising of a tariff barrier against the United States might have a serious effect on Canada owing to the balance of trade in favor of the United States, and there is a general disposition to go very carefully in regard to the bills introduced.

## Hog Marketing In Canada

### Over 120,000,000 Lbs. of Bacon Sold to Great Britain Last Year

Hog marketing in Canada during the past year constituted a record, according to a statement made by the Dominion livestock commission. Supplies kept pace with those of 1924, in addition realizing prices anywhere up to $8.00 per hog more on good hogs than during the previous year. The contributing factors were an excellent market in England for bacon and hams, an exceptionally good domestic demand and a sharp inquiry for live hogs from the Pacific Coast States, and a general improvement in the type and finish of the hogs marketed. During 1925 Canada sent Great Britain about 20,000,000 lbs. of bacon more than in 1924, the total exports being in excess of 120,000,000 lbs. It is estimated that the increase in hog sales between over 1924 for the whole Dominion during 1925 was about $15,000,000.

## Want More Settlers

### Would Have Manitoba Aid in Aggressive Immigration Plan

Formation of an advisory board by the Manitoba Government for purposes of more efficient coping with the problem of immigration, was voted on in a resolution adopted at the provincial economic conference in Winnipeg.

F. W. S. Crispo, Winnipeg, in sponsoring the resolution, expressed belief that the Dominion Government should adopt a more aggressive immigration policy and urged the appointment of a permanent agent by the province, with headquarters in London.

J. Allison Glen, of Russell, Man., was elected president of the conference.

## Saskatchewan Registered Seed

### Seed Growers' Association Improving Facilities For Handling

"Improvement and expansion of the facilities for handling registered seed are included in the programme now being carried out by the Saskatchewan Registered Seed Growers' Association," states M. T. Tullis, manager of the organization. "Last year the acreage from which five tons or more registered seeds as has been done in any given year prior to that time and for the 1925-26 season to date inquiries from farmers in the province and seed houses in the east and south indicate a 50 per cent. increase over the 1924-1925 seed season.

### The Awful Brute

"I told him he was a brute, and returned all his beastly presents."

"And what did the wretch do?"

"Sent me a dozen boxes of face powder in return for what he had taken home on his coat!"

### Precocious Bandits

Judging by the increasing youthfulness of our criminals it would seem as if our modern system of education was fulfilling its promise of teaching the young idea how to shoot.—Tom Mason, in Collier's.

"You simply cannot find a maid who is honest," said Mrs. Smith. "The last one left suddenly with nine of my towels."

"What kind were they?"

"They were those hotel towels I brought back from my holiday."

## Value of 1925 Crop

### Aggregate Value of all Field Crops Grown in Canada is Shown

The aggregate value of all field crops during 1925, according to a report of the bureau of statistics, is $1,159,951,800, as compared with $995,-385,300 in 1924. The year 1925 is the first since 1920, and the war period, that the field crops have exceeded $1,000,000,000 in value. The items going to make up the 1925 total, together with 1924 figures in brackets, are as follows: Wheat, $466,116,200 ($320,-062,000); oats, $201,050,800 ($200,834,-000); barley $57,820,100 ($54,560,000); rye, $9,271,800 ($13,678,700); peas, $5,516,000 ($5,676,000); beans, $3,576,-600 ($3,396,900); buckwheat, $8,880,-600 ($10,149,000); mixed grains, $21,-900,900 ($22,626,000); flaxseed, $15,-665,500 ($18,849,300); corn for fodder, $9,958,700 ($12,447,000); potatoes, $53,614,900 ($7,056,000); turnips, mangolds, etc., $20,564,400 ($17,834,000); hay and clover, $164,555,400 ($165,587,-000); alsnike, $20,720,000 ($14,758,-000); fodder corn, $23,300,100 ($24,-280,000); grain hay, $41,097,900 ($46,-126,000); and sugar beets, $2,784,900 ($2,268,000).

## Cattle Shipments To Britain

### Strong Demand For Canadian Cattle Has Stabilized Prices

During 1925, 110,357 head of cattle were shipped from Canada to Great Britain, as compared with 82,686 in 1924 and 56,649 in 1923, an increase of 34.2 per cent. over the previous year and almost 100 per cent. over 1923, according to a report of the Dominion livestock commissioner. This strong demand for Canadian cattle was instrumental in maintaining domestic prices at high levels.

## Alberta Wool Shipments

### Over Million and a Half Pounds of Wool Shipped to Toronto

Over 1,500,000 pounds of wool have been shipped from Alberta to the co-operative association at Toronto for disposal during the past year. This is an increase of 680,367 pounds, as compared with the previous year, and is approximately one-third of the total quantity supplied by all provinces to the Canadian Co-operative Wool Growers' Association during the past year.

### The Glamor is Gone

A border sheep stealer has been sentenced by Lord Lonsdale to two years' hard labor. The penalty for sheep stealing used to be hanging. This form of theft is exceedingly rare in these days. Rob Roy now "lifts" motor cars, motorcycles and bicycles. Even Sir Walter Scott would find it difficult to garland the motor thief with the glamor of romance. Our criminals are no longer picturesque. There is a slump in highwaymen, pirates, brigands and bandits.—London Sunday Express.

The snare of a drum is not as dangerous as that of a wily drummer.

## Favorable Trade Returns

### Canada's Exports Now Four Times Larger Than in 1910

Thirty-six times unfavorably and twenty-two times favorably, Canada's trade balance has annually stood since Confederation in 1867, according to W. McL. Clarke, director of the Canadian commercial intelligence service. Sales over purchases, when all is added together, however, represent a gain of exports over imports of almost one billion dollars. Physical expansion of Canadian exports is indicated in wheat exportations being four times larger in volume today than in 1910; flour, wood pulp, bacon, hams and whisky, three times larger; condensed milk and butter, seven times greater; oats, 13 times larger; barley, 15 times; rye, 50 times; automobiles, 200 times; and sugar 3,500 times.

Canada's total trade in 1925 was $3,161,000,000, or $295,000,000 more than in 1924. Imports last year were $950,000,000, an increase of $42,000,000. Exports (Canadian) in 1925 were $1,-271,000,000, an increase of $215,000,000; Foreign merchandise exported from Canada last year amounted to approximately $12,000,000. The favorable trade balance of $320,000,000 for 1925, says the bureau of statistics, has only been exceeded on one occasion, viz., 1917, when it amounted to $587,000,000.

## Trained Farmers Coming

### Britishers Interested in Elementary Farm Work to Migrate to Canada

Forty men, who have received six months training in elementary farm work under the auspices of the overseas settlement committee at a training centre near Ipswich, will emigrate to Canada about the middle of March, according to a dispatch received from London, England. This is the first batch of recruits that will migrate to Canada under the new scheme of the overseas settlement committee, under which inexperienced men are given training in the farm methods of the country to which they prefer to emigrate, before leaving England.

## Butter Exports

### Heavy Increase is Shown For 1925 Over Previous Year

Exports of butter from Canada during the twelve months' ended December 31, 1925, were 26,646,535 lbs., as against 22,343,939 lbs. for the previous twelve months, according to a report of the Dominion external trade branch. In addition 4,077,487 gallons of cream were shipped from the Dominion to the United States during the past year, as compared with 3,288,822 gallons in the calendar year of 1924.

### Heavy Wheat Yield

According to reports at Calgary, John Dewart, a farmer of the Jordan district, threshed 7,560 bushels of wheat from 30 acres, an average of 52 bushels to the acre.

Germany's submission to the horrors of democracy is now complete. She is holding a Miss Germany contest.

# Indications Point To More Attention Being Paid To The Poultry Industry In Canada

## Where Hard Wheat Is Grown

### Canada and Northern Europe Greatest Producers of Wheat

That Canada and Northern Europe are the great growers of wheat, and that the United States will never be able to equal their yield per acre, was the statement of Dr. F. H. Hace, director of the soils department, Ohio State University, speaking to the National Crushed Stone Association in Montreal recently. Although Canada's output of wheat is still far below that of the United States, it must be remembered that only a small percentage of the arable land in the Dominion is under cultivation, and when the acreage planted to wheat in Canada equals that of the United States, there is little doubt but that the Dominion's wheat yield will more than exceed that of the United States.

## Canadian Farmer's Income

### Average Income For 1925 is Placed At $1,500

The average income of the Canadian farmer during 1925 was $1,500, according to Dr. J. H. Grisdale, federal deputy minister of agriculture, speaking at the New Brunswick Farmers' and Dairymen's Association, which he stated compared favorably with the average income of the Canadian in other trades and professions. This represented the distribution of the 1,500 million dollars valuation of the 1925 farm products among the million farmers of the Dominion.

## The Fruit Industry

### Said To Be In Better Condition Today Than For Many Years

The fruit industry of the Dominion, as a whole, is in better condition today than for many years, and is improving through the elimination of the careless grower and his poor fruit, according to a statement by G. C. McIntosh, Dominion fruit commissioner, at the annual convention at Vernon, B.C., of the British Columbia Fruit Growers' Association. It is estimated that there are now 200,000 acres in Canada devoted to fruit culture, valued at $120,000,000.

### Hermit For Forty-eight Years

Israel Cousens, of Chester, Nova Scotia, who adopted the life of a hermit when he was rejected by the girl he loved at the age of 20 and who lived 48 years in the different parts of the forest, is dead. He was forced out of his retirement a short time ago by ill-health.

During isolation he never saw a woman except on one or two occasions when inquisitive tourists braved him in his den, only to be sternly ordered away.

The baby chick industry in Canada, whilst still in its infancy, is advancing by leaps and bounds, according to the poultry division of the federal department of agriculture. During the past season many of the breeder hatcheries more than doubled their capacities, according to the same authority, and the prospects are that the same will take place within the coming year.

Ontario and British Columbia are the two provinces where the hatchery business is being carried on in a fairly large way. In the past the industry has suffered a great many trials incidental to a new industry getting on its feet and achieving its initial growth, but according to experts it is now more or less stabilized and standardized. One authority states that the hatchery business is a thousand times safer today than ten years ago. Shipping methods are highly satisfactory, hatching devices are perfected, and the public has been educated to the economic advantages of "ready-made" chicks. It is generally agreed that the hatchery industry is due for considerable growth and offers great possibility to the experienced.

That markedly greater attention is being paid to the poultry industry of the Dominion is evident in increasing population in nearly every province and outstanding in the cases of Ontario and British Columbia. The import of eggs would seem to be on the decrease, but there is apparent considerable opportunity for the development of export trade. Whilst Canada has been purchasing eggs from the United Kingdom, United States, China and other countries, she has shipped heavily to the United Kingdom and to the United States and Newfoundland, whilst Canadian eggs have gone in smaller quantity to Bermuda, St. Pierre and Miquelon and other countries. There is evident opportunity to expand the Canadian poultry industry both to eliminate the import trade and to hold and further build the export business already built up.

An example of what can really be achieved in the poultry industry is furnished by the province of Alberta, which in a few years has changed from an importing to an exporting territory, and now claims second place among the provinces of the Dominion in poultry per farm with an average of 39 head. The province last year exported some 60,000 cases of eggs; the bulk going to England and Scotland. Live poultry handled by commercial packers during the year shipped more than 14,000 baby chicks into every corner of the province.

## Valuable Mineral Discovery

### Only Known Deposit of Lithium Minerals in British Empire Are in Manitoba

The only known deposit of lithium minerals in the British empire having possible commercial value has, according to Dr. J. F. Wright, of the geological survey, within the province of Manitoba. In July, 1924, an outcrop of massive lepidolite was discovered about one mile south of Winnipeg River and 10 miles east and a little north of Pointe du Bois. Within the last six months spodumene and montebrasite and a number of other rare minerals have also been identified in this locality. It is believed that future prospecting will uncover other similar deposits in Southeastern Manitoba and Western Ontario.

## "Rotor" Principle For Ships Is Failure

The dream of revolutionizing navigation by means of the "rotor" principle invented by Anton Flettner has turned out to be just a dream after all. The rotor ship, Buckau, upon which Flettner mounted his twin revolving towers and with which he sought to convince shipbuilders that the day of screw propulsion was done, is to be auctioned.

### Many Settlers Coming

Five thousand settlers are in sight for Canada this year under the land settlement scheme, according to Major John Barnett, chairman of the soldier settlement board. "The majority will come from Great Britain and will be prepared to take root in Canadian soil, as whole families will come out together," Major Barnett said.

Woods Hutchinson has called the fly "the lay automobile of the germ," for as many as 6,000,000 germs have been found in the body of a single insect.

# Empress of Scotland at Nice

Promenade des Anglais, Nice, France

Governed by the sovereign princes of the House of Grimaldi, there is a tiny island in the famous Riveria called Monaco which has been the resort of all fashionable Europe for ages. Washed by the blue waters of the deep blue sea, perpetually bathed in glorious sunshine, the beautiful cities of this little principality are favorite health resorts in winter and bathing places in summer.

World Circles Mermaids Taking Sun Bath.

In Nice, there is the famous Promenade de Anglais, where, it is said, it one waits long enough under the shade of one of the lofty trees, one may meet almost every American in the world who must pass that way at one time or another. The Canadian Pacific liner Empress of Scotland, making a cruise around the world this year, recently dropped anchor in the bay opposite the Monte Carlo Casino. The passengers were taken to Nice by motor where they spent a happy day sightseeing.

## EASTER

It has always been considered in this part of the universe that Easter comes at a very appropriate season of the year when all nature gives the appearance of renewed life, every person is in the proper frame of mind to appreciate the new life, new hope and new aspiration which came to the world on the first Easter morn, thus making the occasion more real, more impressive and more encouraging as each successive Easter roll around.

Next Sunday morning throughout the whole of Christendom there will be heard the voices of men, women and children singing the resurrection hymn "Christ the Lord is risen today." May our thoughts and aspirations be elevated with our voices.

## GOSSIP ACTS AS A BOOMERANG

"THE older I grow the more convinced I am that scandal is at the bottom of half the evil in the world, and that more people have been driven to desperation through the long tongues of other than by any other one cause." Struther Burt the writer, has this to say, and he adds this proverb from the Spanish to it: "A fish dies through its own mouth."

His meaning is clear. For malicious gossip kills something in the soul of the person who spreads it.

The famous Margot Asquith tells about a party she attended in her early youth. She was gossiped about because she wore a thin white dress, when the other women had on their diamonds and satins.

"Do look at her! She has on her nightgown!" one woman said.

The whisper reached Margot's ears, and the woman made a lifelong enemy of the most powerful woman in England, as Margot later was.

And so it often happens that slander and back-biting often miss the persons for whom they were intended, and, like a boomerang, come back to smite the thrower.

A preacher of recognized sincerity and humility expresses our opinion in the following words:

"The years and more of public service have brought us face to face with every kind of character. It is but to tell the truth to say that as beween gossipers and other moral perverts, I put the gossiper at the bottom of the list. The drunkard, the gambler and the thief are all white and shining angels in my judgment, as compared with the long-tongued vipers who suck blood of the good names and pure characters like some famished leech of torment."

## THIS REASON, FOR GOOD BUSINESS

A mer sells a load of wheat, and all the world grows fair and sweet; he hums a couple of cheerful tunes, and pays the grocer for his prunes. The grocer who had the blues, now buys his wife a pair of shoes. That ten the shoeman thinks God sent, and runs and pays it on the rent. Next day the rent man hands the bill to Dr. Carver for a pill. And Dr. Carver tells his frau that business is improving now. And cheers her up and says, "My dear, you've been quite feeble for a year. I'm thinking you should have a rest; you'd better take a trip out west." And in a couple of days the frau is on the farm of Joseph Howe. She pays her board to Farmer Mowe, who takes the bill and says: "I swow, here's something that just can't be beat—this bill's the one I got for wheat." He hums a couple of cheerful tunes and goes and buys a lot more prunes.

Judging from the evidence which came out at the trial of those deputy returning officers who were charged with fraudulent practices, that must have been some election in the Peace River constituency. Destroying ballots, losing ballot boxes, deliberately spoiling ballots and allowing impersonation were also among some of the stunts practised by the D.R.O's. It's no wonder the returns from that constituency were belated.

Getting one's hair bobed is like buying a car. It isn't so much the original outlay as the upkeep which worries one.

## Here and There

Canada has officially invited the British Dominions and colonies and all foreign powers to attend the world's poultry congress at Ottawa, which is to be held from July 27 to August 4, 1927. Three thousand delegates are expected to attend.

Canadian construction contracts for the month of January totalled $12,669,000 as compared with $8,934,700 in January 1925. This record for January indicates that winter construction is rapidly increasing in favor.

Mardi Gras celebrations at Quebec started off along the lines that have made the Ancient Capital famous throughout the continent. This year the activities were rendered even more interesting by the fact that the city is now at the height of its winter sports celebrations.

The value of the wheat crop of Saskatchewan was $264,606,000 in 1925, or substantially more than half of the total Dominion value. A total of 13,002,741 acres were seeded which yielded an average of 18.5 bushels per acre, or a total of 240,551,000 bushels.

One of the most remarkable escapes from sudden death was witnessed at Aylmer, Quebec, when a chauffeur attempted to beat the train to the Aylmer Road Crossing and reached the tracks the very same moment a train was passing. The taxi driver and his two passengers were thrown from the car and were unable to speak on account of the shock and fright. They were otherwise uninjured.

David E. Brown, 71 years of age, died J. A. Fullerton, 81 years old, died at Vancouver, B.C. on the same day, February 10. They were two of the best known figures connected with the early history of Vancouver and the construction of the Canadian Pacific Railway. Brown was the first agent appointed by the company at Port Moody in 1886 while Fullerton served thirty years in Montreal with the old Allen Line, going to Vancouver in 1888.

### ALBERTA REFINERY TO START OIL SHIPMENT

The Alberta Refineries at Edmonton will start shipment of its product the coming week, the first carload of refined oil going out to Bashaw. The refinery will start also to supply oil to the Canadian National Railways.

## Rah! Rah! Collegians Planning to Invade Europe To Call Upon England, Holland Belgium and France

England, Holland, Belgium and France are the popular countries for collegiate tours during the summer of 1926, and the St. Lawrence route seems to be the popular short route for many students. The idea of being able to cross the ocean and get back home again at the price usually paid for one way, seems to be the necessary inducement to colleges people, and bookings are much ahead of last year.

No one should attempt to see Europe without a background of England. The experienged travelers arranging the collegiate tours realize this, and plan a week visiting Oxford, the great intellectual centre, Stoke Poges and other bits of rural England, and London. London, so full of interest historically and with many nooks and crannies filled with the ghosts of famous literary personages!

France comes next to England in popularity with college folks. Some there are who become so thrilled with life in Paris that a second trip across the ocean would be incomplete without at least a week in the gay boulevards and art galleries of France's capitol. But there are others to whom the somewhat superficial atmosphere of the chic Paris is less attractive than the wooden shoes and quaint caps and flaxen braids of the Hollandaise.

Very few in Canada have not some keen personal interest in the battle areas of France and Belgium, and so most of the collegiate tours embrace an extensive motor trip through Belleau Wood, Chateau Thierry, Soissons, Senlis, and Rheims.

The idea of the collegiate tours is rapidly becoming an accepted thing. At first, to travel third class did not appeal even to the enthusiastic students unable to do travel without a substantial reduction in even the second class fares. But, realizing the interesting number of professional people willing to travel at reduced rates, the steamship companies inaugurated the tourist third rate, put rugs on bare stateroom floors, revised the menus to suit Canadian tastes instead of foreign, and the result was that students and professors last year hobnobbed with each other below decks. This year ever increasing numbers will follow the example set by the venturesome ones of last year.

## WINTER SPORTS IN CANADA

Dyer—to the Lauren. tians. Quebec Lower—Lady Driving Huskies around Banff, B.C. Inset—Sid-ing at Mont Rolland.

Canadian winter sport enthusiasts feared that the lack of snow would prohibit the usual activities this year in the realm of ski-ing, snowshoeing, tobogganing and hockey. But "Our Lady of the Snows" lived up to the name bestowed upon her by a brilliant writer, and long before the winter was half through a deep, luxuriously soft white blanket had fallen, clothing trees and rivers and mountains in a popular shade of white.

To the Laurentian mountains in the province of Quebec, flew thousands of city dwellers for joyous holidays at every opportunity. Such swarms of sport lovers were there that the Canadian Pacific Railway provided special coaches for skiers where accommodations were made for skis. At Mont Rolland, Piedmont, St. Marguerite and Shawbridge, resorts were overcrowded.

Once among the picturesque hills and vales of the Laurentians, numerous parties made excursions into the fastnesses of the ghostly forests. Some climbed to the tops of the mountains to see more clearly the marvels of nature's beautiful colors in the heavens. Others, driving along the roads in crammed sleighs, watched the sun, like some golden orb in the distance, roll over slowly on one side as it descended at the end of a gorgeous day to give the world rest in darkness.

At Revelstoke, British Columbia, mountain gliding gained its popularity overnight. A long thin line of hardy enthusiasts would stand at the top of a hill. Then the line would break as they went plunging downward, scattering in all directions, through trees and shrubs, to the road thousands of feet below.

At Banff the Winter Carnival provided thrills for the large number of visitors there. Queen Gabrielle officially opened the Ice Palace, a number of young ladies organized hockey teams while others donned Indian garbs and learned to drive teams of huskies.

# Losses On Hog Shipments

### Alberta Swine Breeders Would Take Steps to Prevent Heavy Losses From Bruises

At the recent annual meeting of the Alberta Provincial Swine Breeders' Association a special committee was appointed to devise ways and means of lessening the heavy losses on hogs from bruises received between the farms and the packing plants. The committee, which was composed of S. G. Carlyle, livestock commissioner; Dr. Talbot, provincial veterinarian; B. W. Lund, manager Swift Canadian Company; W. Donald, manager P. Burns Company; M. Curtis, Dominion market representative; Dr. Sinclair, University of Alberta; R. H. Bell, C.N.R.; K. Elliott, C.P.R.; W. F. Stevens, Alberta Livestock Pool; A. E. Cotterell, president Alberta Swine Breeders; Wm. Gilbert, Alberta delegate Canadian Swine Breeders; O. R. Ball, Alberta livestock board; W. J. Stark, secretary, Alberta Provincial Sheep Breeders; met, and after further consideration to the matter, passed a resolution requesting the Hon. George Hoadley, minister of agriculture, to arrange for an educational campaign, including moving pictures, such as used at the Chicago international show. A request was also made to the railroads asking them to provide proper chutes for unloading hogs at the yards at country shipping points.

A special sub-committee composed of Messrs. Sinclair, Lund, Donald, Curtis, Carlyle and Stark, was appointed to map out a publicity programme, including placards to be posted at railway shipping points, stockyards and other suitable places.

The meeting also decided to recommend to the Alberta Swine Breeders' Association that a request be sent to the Canadian Swine Breeders' Association through Wm. Gilbert, the delegate from Alberta, asking them that financial assistance be given towards this movement, also that the packing plants, the railroads, and the university and other interested organizations be asked to co-operate in financing the scheme.

## Wild Life of Barren Lands

### Wanton Killing Likely to Exterminate the Musk-ox

The musk-ox is going the way of the plains buffalo, according to word which filtered down to Fort Resolution this winter, by the "moccasin telegraph" from the Artillery lakes district, and it is stated that these animals are rapidly disappearing due to the attacks made upon them by the roaming Eskimos. Herded by the Arctic wolves' hunkie dogs the musk-oxen loom together and remain in a huddled mass until the whole band is wiped out.

Now comes word that the Indian hunters are gradually penetrating eastward over the "white fox" each winter, that they are meeting with isolated bands of the Arctic oxen and are obeying the natural impulses to shoot.

The rumors and camp talk from the north indicate that due to the open winter in the Barrens the musk-oxen have drifted further south and west than in their wont, with dire results to them.

Slaughter for the lust of it is stated to be the case in respect to the caribou migration, and as in the old days large numbers of the deer are being killed for their tongues, the rest of the carcass being left to the foxes.

Wanton killing is charged, and the opinion is expressed that immediate action is necessary to offset these depredations on the wild life of the Barren Lands.

### Must Have Been Valuable

A man, over seventy years of age, when boarding a train at Chorley, Lancashire, dropped a piece of cheese on the line. When he alighted, two stations away, the man asked officials to telephone down the line for his cheese to be sent along. The piece, weighing one ounce, was duly received, put in an envelope, and dispatched by the next passenger train. The owner met the train and received the precious morsel from the guard.

### Poodles Have Least Stability

More poodles go to the bow wows because of rabies than any other breed of dogs, says a health department report made by Dr. John Oberwager. Angry dogs bit 60 per cent. more people in 1925 than they chewed on in 1924. Seventy-six rabid dogs were caught last year and Dr. Oberwager charges the poodle with having less stability than other dogs. Last year 7,681 persons were bitten.

### Following Directions

Doctor—Did you open both windows in your bedroom as I ordered?

Patient—No, sir. There is only one window, so I opened it twice.

## Plenitude Of Poets

### Number of Poets Said to be Increasing by Leaps and Bounds

The world is growing very full of poets. So much so that it is becoming difficult to find anybody that does not occasionally "drop into poetry." A writer in one of the British newspapers said the other day, that there were one thousand "registered" poets in England alone, and a growing number in Scotland and Ireland. He evidently used the word "registered" in a Pickwickian sense, intending by it to indicate those verse-writers who might be regarded as pedigreed and proper, and who had given evidence of this by appearing in reputable print. But it is evident that in addition to these there must be an equal number, at least, who write verse "by stealth" and would be overpoweringly glad "to find it fame."

On this continent, and in all the dominions, the number of poets is increasing by leaps and bounds. They gather in groups, and every pocket-ed are a feature of modern society. Not long ago there was published the first anthology of the New York branch of the League of American Penwomen, containing poetic gems and ballads from 75 contributors.

It would appear, however, that the number of Japanese and Chinese poets is the thousand of population is greater than the ratio in the countries already mentioned. A Japanese author, describing his country, gives it as one in four, which would be 14,000,000. But these do not try to get into print. They write their verses on nice cards and give them to their friends.—Vancouver Province.

## Old Law Records Searched

### Find Prince of Wales Free to Choose His Own Bride

Reports pointing to Princess Astrid of Sweden as the possible future bride of the Prince of Wales have been responsible for searching of old law records which indicate that under certain circumstances members of the royal family may contract a lawful matrimonial alliance without consent of the sovereign.

But should the heir apparent select the Swedish princess as Britain's next queen, it has been pointed out in London, it is not likely that the King and Queen would offer any opposition to the Prince's choice, as the young woman is exceedingly popular with both of them.

The royal marriage act, against which so many have recently provides that if a descendant of George II. has completed his or her twenty-fifth year and desires to make a match for which the sovereign's consent cannot be obtained, notice may be given to the privy council and unless both houses of parliament raise objections, the nuptials may be celebrated one year afterward.

Up to the present time no Prince has ever availed himself of the privilege, notwithstanding the tight hands in which members of the reigning house are held by the act. It is, however, does not affect the children of princesses marrying into foreign families.

## Do Not Stick To College

### One Out of Every Three Drops Out Before Graduation

It is found that about thirty-five per cent. of those annually admitted to colleges do not reach graduation, that out of every three drops out. A certain proportion of this one-third of our students are compelled to quit because of financial and similar circumstances. They have been greatly benefited by the partial college course.

However, college officials who understand the situation say that a great majority of those who drop out do so because they "flunk."

Professor Howard, of Northwestern University, accounts for the flunking of so many students in this way:

"Too little sleep, too much play, not enough study, too much alcohol, dancing, and diversified thinking are factors that devitalize students and are responsible for the delinquent groups in every university."

## Manitoba Provincial Savings Bank

Great progress has been made since the establishment of the Manitoba Provincial Savings Bank. The number of depositors has increased from 3,341 to 30,415. Deposits have increased from $624,230 at November 30, 1920, to $11,408,459 at April 30, 1925, states the annual report recently issued.

### Who's Cheated

"I'm sorry I married you," sobbed the bride.

"You ought to be," he replied, "you cheated some other girl out of a mighty fine husband."

Ruth—"Was her operation a success?"

Ethel—"It certainly was, my dear! She married the doctor!"

# Drivers Are Self-Hypnotized

### Many Motorists Are Oblivious of Common Courtesy and Safety

If the writer of a recent article in an automobile journal is correct, many motor accidents are caused by what he calls "self-hypnotism" on the part of the drivers, and he strengthens his case by relating several incidents in point. According to his theory, in some mysterious way the motion of the rapidly traveling car deadens the senses at the very time when they should be unusually alert. He declares that he has himself observed an expert chauffeur permit his car to crash head-on into another car approaching from the opposite direction, though he had his eyes wide open and to all appearance his attention was in no way distracted from the job of driving. Whatever of truth may be in this theory, the fact remains that an increasing number of motorists seem oblivious to the requirements of the law and of common courtesy and to the safety of operating their cars.

Yet another critical observer has thus classified dangerous and inconsiderate drivers: The man who leaves his empty car standing in a busy street all day long; the man who turns a corner at 15 miles an hour after a single toot of the horn, giving the pedestrian no chance; the man who passes to the left of a trolley car when the street is empty or crowded; the man who drives at 10 miles an hour on a country road when traffic is heavy, holding up 20 or 30 cars; the man who, intending to turn a corner, rushes up alongside the car on the right, thrusts out his hand, swings across the front of the other and compels the latter driver to make his car stand on its nose to prevent a collision; and the worst nuisance of all, the man whose passengers stick their hands out in all directions, leaving you to guess whether he intends going to the right or left or up in the air.

Every considerate motorist is interested in the observance of the ordinary rules of the road. The majority are careful. For the sake the general safety there ought to be some way to make all toe the mark.

## Shorthand Used By Ancients

### Principle of Abbreviation Has Hampered Work of Modern Translators

Shorthand was used by a stenographer employed by the apostle Paul to take down his addresses, according to a professor of the University of Chicago. This fact, he said, was revealed through recent studies of the Greek papyri bearing the original Scriptures. That the writing of shorthand in those days was definitely established trade is shown in the thesis through a contract of 155 A.D., in which an ex-magistrate of Oxyrhynchus apprenticed his slave to a shorthand writer. The form of the writing is not clear. However, the principle of abbreviation was used, which has complicated the work of modern translators considerably.

### The Misplaced Comma

The wife of a naval man handed the pastor this note: "Peter Bowers, having gone to sea, his wife desires the prayers of the congregation for his safety."

The minister glanced over it hastily and announced: "P. Powers, having gone to sea his wife, desires the prayers of the congregation over his safety."

"Waiter!"

"Yes, sir!"

"Turn off that fan, please."

"But, sir, I—"

"Can't you see that my stock's blowing away!"

## Fin Skating Ace Claims Canadian Rinks Too Small

Charles Thunberg, the famous speed skater from Finland arrived at the C.P.R. Windsor Station at Montreal recently after taking part in the International races at Saint John, N.B. In the party was also Lolis Brooks, of Toronto, the world's woman champion skater.

While in the metropolis for a few hours Thunberg paid a visit to Alderman Louis Rubenstein, when he expressed through his interpreter his pleasure at meeting the Canadian who won the Amateur Skating Championship of the World in St. Petersburg, Russia, more than thirty years ago. Thunberg said he was disappointed at the small tracks they have here, and admitted that he could not do his best work on them.

The photo shows, from left to right, front row: Miss Elsie Mueller, New York; Lolis Brooks, Toronto; Lois Mihlbohn, Chicago. Back row: Charles Thunberg, Finland; O'Neill Farrell, Chicago.

## Says Men Estimate Time More Accurately

### Women Are Often Wide of Mark According to Recent Tests

The old question, "Why does a woman keep you waiting?" has been solved, Johns Hopkins University psychologists announce.

A series of tests involving 1,064 students equally divided between men and women in seven colleges selected throughout the country, have shown, the announcement says, that women as a rule show nearly 100 per cent. error in estimating how long it will take them to dress for an engagement, or perform any task. Men show an average of 45 per cent. error.

On the other hand, while the women were wide of the mark in estimating time, it was shown that in following instructions they were as accurate as the men and more careful.

One test had the subjects sit still for a minute and a half and then estimate the time. Women's estimates ranged from a few seconds to 10 minutes. The most incorrect estimate by a man was three and one-half minutes.

The ratios held true in estimating time of lectures, letter writing, dressing, eating and a wide variety of other tasks.

The conclusion of Dr. Isabel Stewart, directing the tests, is:

"Men estimate more accurately. The inaccuracies of women are predominantly underestimated, implying that time really seems shorter to women than to men."

## Most Popular French Hero

### Saver of Life Thousands of Votes Ahead of Killer

They took a vote in France recently as to who, in all French history, is the most popular hero of all time.

Many thought that Napoleon Bonaparte would win.

But he did not. Louis Pasteur won. Napoleon was next, but thousands of votes behind.

In the last two years several biographies of these men have been issued from American presses. Napoleon's chapters are headed: "Monarch," "The Retreat from Russia," "Elba," "Waterloo," "St. Helena," et cetera, while Pasteur's life chapters are headed: "Studies on Crystallography," "Contagion—The Antiseptic System," "The Prophylaxis of Anthrax," "Rabies."

The one was the killer, the other the saver of human life.

We are more civilized when we vote to give our popular oath to a Pasteur, rather than to a Napoleon; to a doer rather than to an un-doer; to a Savior rather than to a Killer.—Dearborn Independent.

### Good Business

Two gentlemen stopped on the street to talk to each other. One wore a large diamond tie pin.

"Isaac," said the other, "dot is a fine diamond you have. Vare you get it?"

"Vell," said Isaac, "my brother Jo died and left me $400 for a stone. Dis is de stone."

### Natural Gas For Calgary

From the Imperial Oil Company's wet gas well in the Turner Valley, Sutton Alberta, 600 barrels of naphtha per day is being extracted from the natural gas, while the gas, after passing through a scrubbing plant, is piped to Calgary for domestic purposes.

First Visitor.—"My dear, those cakes are as hard as stones."

Second Visitor.—"I know it. Didn't you hear her say when she handed them around 'Take your pick'?"

## Wrote Prisoner's Song

### Sailor Songster, Who Died Recently, Claimed This Distinction

Who wrote "The Prisoner's Song?" The death of Guy Stapleton Massey, 27-year-old sailor songster, has revived the controversy, the music publishers Edward Marks claiming that Massey, who died in Texas recently, plagiarized the song, which is so popular now in night clubs and with radio singers.

Massey, during his illness, said the song was written "from my own heart," and the tune picked up when he sang too prisoners in jail. Authorities on folk songs contend the ballad was known as a cowboy favorite 30 years ago. Anyway, the controversy has not been settled, and the man who claims he wrote it died in poverty, having assigned his royalties to an unmanned third party. Of the 500,000 copies sold, Massey is said to have received only about $1,000.

The death of the young composer was the result of a complication of diseases brought on by exposure when Massey, while serving in the navy in the world war, jumped overboard and rescued a fellow seaman. For this, he was cited for bravery—the second time he had been so honored.

## Making Unfair Comparisons

### "Inferiority Complex" of Canadians Deplored by Alberta Professor

Gentle criticism of an alleged Canadian inferiority complex was made by Dr. Henry Marshall Tory, of Edmonton, director of the national research council, before the New York Canadian Club, New York. Dr. Tory is president of the University of Alberta.

"We are always," said Dr. Tory, "making comparisons with the United States to our own disadvantage. These comparisons have given to young Canadians a sort of feeling that their own country is not quite the equivalent of other countries. I don't like to use the term 'inferiority complex,' but that is what they have. It is a kind of looking toward this country which is not wholesome."

Canadians, Dr. Tory thought, should see Canada as a young aspiring nation and make comparisons with other nations in the same stage of development. He then went on to discuss the advantages, economic and spiritual, which Canada possesses.

One of the Dominion's difficulties, he said, was over expansion.

"In our effort to grab for the present generation the wealth of a great new country, we have placed ourselves in a position of carrying too much overhead."

## Should Teach Children Respect For Law

### Being Strict in Time Will Save Trouble Later On

They say it is best to be strict with children robs them of spirit and individuality.

One great asset to a parent is discrimination, but it is a thousand times better to have a little surplus spirit than to live to see children cast into prison or with a noose around their necks, with a curse for you on their lips in the bargain. Being a little strict in the ways about for a good and useful life and they will honor and respect you to their dying day.

We all know that a constant repetition of little faults and "getting away with them" is what leads up to the great crime in the end. If little ones acquire the proper respect for all law while growing up, it will stand by them and protect them all through life.—Letter in Chicago Daily News.

## Has Changed Owners

### Elder Son Succeeds to Ownership of Famous Irish Estate

The blarney stone has changed owners. Sir George Colthurst, who had owned the famous old Blarney castle for many decades, is dead, and his eldest son, who now becomes Sir George, has taken over the historic old ruin.

The new owner, a keen sportsman, will make his home on his ancestral property.

Blarney castle is still open to visitors and hundreds of tourists are lowered by their heels to kiss the blarney stone every month.

### Prince Is African Colonel

For the first time in his life, the Prince of Wales has accepted an appointment to a regiment belonging to one of the British dominions. He has become colonel-in-chief of the West African regiment. In addition to this he is colonel of the Welsh Guards, a group captain in the Royal Air Force, and colonel-in-chief of 16 English, Scottish, Irish and Indian regiments. He is also captain in the royal navy.

When a Kansas man recovered his stolen car he found 100 $50 bills in the spare tire. A bank later claimed the money.

# To Remedy Soil Drifting

### Solution Is Looked For In Systematic Crop Rotation

"Permanent solution of the soil drifting problem is to be looked for in systematic crop rotation," declares Professor A. H. Joel, University of Saskatchewan, who has just issued a report on soil surveys made in the Moose Jaw, Swift Current, Govan-lock Rokeart and Weyburn districts.

"Such rotations should include the use of perennial grasses and legumes for the restoration of organic matter to the soil, especially the root fibre," adds Prof. Joel. "Each field on the farm should in turn be subject to seeding down and subsequent breaking. Corn or other summerfallow substitutes may be used profitably, reducing in part, at least, the acreage devoted to the fallow which is particularly dangerous. Breaking the farm into smaller fields, with the consequent fencing, and the cultivation of each field under a definite rotation system, will in itself go a long way to the solution of the drifting problem. With lighter texture of soils, the proportion of land under cultivation must be reduced, and the rotations practised should be such as to provide a minimum amount of stirring of the soil. The introduction of crop rotations should not only assist in solving the soil drifting problem, but should make for better yields, less manard, less waste of the soil's fertility, and, all in all, for a more profitable and permanent agriculture.

"What can be done of a temporary nature to control soil drifting in the way of careful management of the soil and the use of protective crops. First of all, it is important that, instead of trying to summerfallow and plain a dust mulch, the effort should be towards a granular or small cloddy surface. To this end, the cultivator is to be preferred to the disk and harrow. A cloddy tilth should be such as may be produced with a cultivator, a much more effective in stopping the roll of fine drifting soil than is the fine, level surface produced by the too frequent use of the disc and harrow. Late ploughing of the summerfallow lessens the amount of subsequent tillage necessary to keep the land free from weeds. If the late ploughing is preceded by early surface cultivation, the late ploughed summerfallow is at no great disadvantage from the standpoint of moisture. Spring ploughing seldom drifts, except on very light land, and advantage may be taken of this fact.

## A Friend of the Dog's

### Says They Are Immeasurably Beyond Human Beings in Many Respects

From childhood, I have had dogs around me. For the past thirty-odd years I have made an intensive study of them. The more I learn, the more I find I have yet to learn. But I has not taken me that time nor a tithe of that time, to discover that they are our superiors in 10 things out of 20. Intellect (not intelligence) and the dubious blessing of speech—these two matters we are their betters. In a hundred others—in sweetness longsuffering, in foursquare honesty, in humor, in stamina, in adaptability, in wisdom, in pluck, in all five of the so-called senses (except vision) in normality, and in many another fine detail—they are immeasurably beyond us.—Albert Payson Terhune in Harper's.

## England's First Great Physician

### Thomas Linacre Established Royal College of Physicians in London

The first great physician of modern times in England was Thomas Linacre, who was born in Canterbury 400 years ago, twenty-three years before Paracelsus. (Theo Bombast), and was predecessor by more than a century of the great Harvey. He reformed medicine of its many crudities and superstitions and established the Royal College of Physicians in London, the first institution of its kind, although he himself obtained his medical education at the College of Padua, in Italy. He was physician to King Henry VIII. of England.

### The Poorer, the Better

"It's an old saying that the better the weeds the more they are recommended and the greater the sale."

"It's the other way about in my business. The worse the article the more there are used."

"What do you sell?"

"Matches."

### Not Quite Like Her

Gordon—"For years I've been dreaming of marrying a girl just like you."

Alicia—"If she were just like me she wouldn't have you."

The human of the average man contain about five quarts of air.

## WORLD HAPPENINGS BRIEFLY TOLD

New York's snow removal bill this winter has reached the unprecedented total for February of $5,400,000.

Charles McLeod, one of the oldest members of the Massey Harris Company's organization, died recently at his residence in Toronto, aged 85.

The department of overseas trade is considering the probability of promoting the production of raw silk with in the British empire.

That the board of grain commissioners has decided to grant an appeal board in the city of Edmonton, is the information received by the board of trade from the secretary of that body.

It is stated in London, though there is no official announcement to the effect, that the Prince of Wales is shortly to commence regular work at Buckingham Palace assisting the King in the daily business of government.

The inhabitants of the Christian village of Marmueh near Damascus, totalling about 40, were massacred by a native band, described as composed of brigands. Marmueh is 55 miles northwest of Damascus.

More than 250 persons are seriously ill with influenza and twenty deaths from the malady have been reported in Dallas, Tex., statistics showed. Thousands are suffering from a mild form of the disease.

Canadian trade continues to go ahead. In the ten months ending January, according to returns from the customs department, total trade was $1,881,000,000, an increase of $216,000,000 over the corresponding ten months of the previous fiscal year.

One of the original copies of the Gutenberg Bible, 471 years old, and one of the first printed books, was sold at public auction in the Anderson galleries for $106,000. The purchaser was Dr. A. S. Rosenbach, of Philadelphia.

Discovery and isolation of the cancer bacillus is claimed by Dr. Joseph Schumacher. Addressing the Microbiological Society, Dr. Schumacher said the bacillus was extremely large and shaped like the letter S with nodules at the ends.

Brig.-Gen. R. W. Patterson was re-elected president of the Ontario Rifle Association at a meeting in Winnipeg. Lieut.-Col. Webb, mayor of Winnipeg, was elected an honorary president. Vice-presidents representing Saskatchewan are: Hon. J. H. Wilson; Lt.-Col. F. J. James, Regina; O. D. Hill, M.L.A., Medicine Hat; J. A. Calder, Moose Jaw; and George Edwards, Regina.

## Another Scientist Imperils Health

**Professor Took Great Risk to Solve Important Problem**

To the long list of scientists who have imperilled their health, if not their lives, in the pursuit of knowledge that will benefit mankind must now be added the name of Professor Joseph Barcroft, who has been appointed professor of physiology at Cambridge University.

Professor Barcroft, it has been announced, spent six days in a hermetically sealed "safe" box in order to solve old question as to whether it is possible to calculate the amount of oxygen in a man's blood under certain conditions. The problem has in recent years become of great importance, particularly in connection with aviation.

One result of his self-imposed imprisonment is that he has lost his hair "quite." A quiet, unassuming man, he risked his life several times in potash gas experiments during the war.

## Automotive Vehicles

**U. S. Leads the World in Number of Motor Cars**

The world's total of gasoline-driven automotive vehicles January 1 was 25,979,928 against 23,700,348 on January 1, 1925, the American department of commerce states. The total at the first of this year included 20,799,151 passenger cars, 181,572 buses, 3,454,392 trucks and 1,549,766 motorcycles.

The United States leads the world in the number of motor cars of all types, including 17,317,557 passenger cars, 80,000 buses, 2,146,579 trucks and 155,000 motorcycles, a total of 19,999,426 motor vehicles. The United Kingdom comes next with 1,874,572 vehicles, while France is third and Canada fourth.

**Banff Tourist Trade**

Over 21,000 tourists passed over the Banff road, at Banff, during the past season, according to figures compiled by the superintendent of the Banff National Park, which was an increase of about 2,000 over the previous season.

Some are born tired and some seem to have been born to make others tired.

## New Theory About Hair

**Playing Stringed Instruments Promotes Growth According to Scientists**

If all the violinists in the world assembled together in one vast building, and they numbered, say, 100,000, it is probable that there would be but 100 among them with bald heads. But if the same number of brass instrument players were inspected, bald heads would be as common as flies in summer time!

If you doubt this, make a point of observing the heads of the orchestras in the cinemas or theatres you patronize.

Scientists declare that the playing of stringed instruments induces hair growth. A series of experiments on the partly-bald has proved that stringed music has power to raise a hairy crop!

Cornet and horn players lose their hair early; theirs is the wrong sort of music from the hirsute point of view. The explanation advanced is that the physical strain of blowing affects the circulation and deprives the roots of the hair of their due supply of blood.

## Woman Is Veterinary Surgeon

**Irish Girl Only One Practising Profession in United Kingdom**

It is strange to hear of a profession that is not overcrowded; it is strange or still to be told that there is only one woman veterinary surgeon in the kingdom. This is Miss Alice Cust, daughter of the late Sir Leopold Cust, who began practising in Ireland and soon had such a big practice that she required four horses to cover her country. She has now settled on the borders of the New Forest.

**Molded and Flared Lines Dominant**

Fashion cuts her collar high and her sleeves long, and both will lend charm and distinction to your frock. The simple severity of the crew collar is youthful and imparts chic to this frock, the upper part of which is fashioned on princess lines, closing at the left shoulder under a row of tiny buttons. There is band of contrasting color and fabric contrast, the bodice being developed in satin or metal cloth and the skirt in velvet. A ribbon in a rich brocaded design is lightly drawn about the hips before being tied in a bow knot at the left side. No. 1254 is in sizes 16, 18 and 20 years (or 34, 36 and 38 inches bust only). Size 18 years (36 bust) requires 4¾ yards 54-inch, or 2¼ yards 54-inch material. The total of the 2¾ yards ribbon 5 inches wide. Price 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 15 cents the copy.

### How To Order Patterns

Province .....

Send 20c coin or stamps (wrap coin carefully)

After a man gets off his witty remark he is expected to give a continuous performance.

## ON THE AIR

**What Is Doing in the World of Radio**

A good record for daylight reception was made by R. T. St. James in Chicago when he heard KFI of Los Angeles broadcasting a football game. The broadcasts of the game began at 12.30 in the afternoon.

R. H. Ranger, of New York, set up his radio receiving apparatus at the base of the Sphinx in Egypt and heard his wife talking in Pittsburg, according to the Westinghouse Manufacturing Company.

A 50-kilowatt transmitter is being installed at Ft. Leavenworth, to make this the key to the entire radio communication system of the United States Government. It is one of the most powerful stations in the country.

An important investigation just completed under the direction of George K. Burgess, director of the United States bureau of standards, shows less harmful effects from high power broadcasting stations than had been expected by this bureau.

A new record for amateur radio communication is believed to have been established by a Vancouver amateur, Earl Chang, when he was in communication with a ship lying in Discovery Inlet, Antarctic Ocean, more than 10,000 miles away, for more than fifty minutes.

Determined to collect the $1 tax from approximately 40,000 owners of radio receiving sets in Montreal, officials of the department of marine and fisheries prosecuted seven owners in the police court recently. Judge Cusson ordered them to pay their licenses and court costs with the options of eight days in jail.

In 1923 there were 2,500 radios on farms. In 1925 the number increased to 650,000. Furthermore, the farmer is not a buyer of cheap sets. In 1923 the average price paid was $175. In 1925 the high price sets were all the best sellers to farmers, says Good Hardware. Sets selling from $125 to $400 were better sellers than the $100 sets.

The three-tube set will give good loud-speaker volume on signals over quite a wide range. While it is impossible to accurately estimate the range of a receiving set (since so much depends upon local conditions) in general a range of 1,000 miles may be expected from a receiver of this type when it is operating under normal conditions.

## Wonderful Invention Of Irish Engineer

**Obscuring of Light by Fog Causes Siren to Ring**

An automatic fog siren recently installed in a French lighthouse has been hailed as one of the greatest aids of modern innovations. It is operated by the humidity of the air.

But a much more wonderful and up-to-date appliance is already in operation at the entrance to Dublin Bay. Here the obscuring of a light by fog actually causes a warning bell to ring.

The light in the lighthouse is so arranged that its rays fall on to a sensitive "electro-photo cell" in another lighthouse on the other side of the channel.

When the beam has been obscured to a certain point by fog, the reduction of light falling on the cell causes the bell to ring loudly. An invention of an Irish engineer, it is the only machine of its kind operating in the world.

## Newsprint Industry

**Thunder Bay District to Become Largest Newsprint Centre in the World**

Within five years the Thunder Bay district, including the Nipigon, will be the largest newsprint paper centre in the world, according to F. N. Youngman, manager of the Thunder Bay Paper Company. A number of companies are already operating in this district and, as a result of the large timber grants made by the Ontario Government to these concerns, the organization concerned is to make extensive additions to their plant in order to comply with the requirements of the grant under which they secured these timber concessions.

**Millions of Years**

The human race has millions of years before it on this earth, according to Sir Oliver Lodge, in a recent lecture on evolution. He indicated his opinion that mortals are contemporary in communion with an unseen world.

**Was In Siege Of Lucknow**

Mrs. William Moss, of Great Yarmouth, Eng., who first celebrated the 53rd anniversary of her wedding, is one of the few living survivors of the siege of Lakhnow by the Indian mutineers in 1857. She was only seven years old at that time.

## Can Build New Faces

**World's First Plastic Surgery Hospital Planned For New York**

Plans have been prepared for the world's first hospital to be devoted exclusively to plastic and cosmetic surgery which is to be erected in New York during the coming summer. The new institution which is expected to open in November, will be known as the Plastic Hospital and the staff will be made up of a dozen or more of the most able ethical surgeons now engaged in this new work.

A public clinic will be opened in connection with the Plastic Hospital where poor people will be treated free of charge. Another department will be established where women of moderate means may have operations for the correction of facial irregularities performed at greatly reduced fees which may be paid on the installment plan.

The free clinic and part-pay department, according to reliable information, will be founded and supported by a wealthy New York woman whose name is not obtainable at this time. She is said to be making the contribution in appreciation of a recent successful operation for the restoration of a badly scarred face and a broken nose which she sustained in an automobile accident. The hospital itself will be financed entirely by members of the Metropolitan medical fraternity.

During the past three years plastic and cosmetic surgery has been raised to the dignity of a recognized specialty here, and at the present moment several of New York's best known ethical surgeons are doing this work. A plastic surgery department has just been opened in the Mayo Brothers' Hospital of Rochester, Minnesota, under the direction of the celebrated war surgeon, Dr. Gordon New. At least a score of other prominent American hospitals are expected to announce the installation of similar clinics within the next few months.

## Honored In Constantinople

**Aged Man Unable To Work Saved From Starvation**

The famous old Turk, Zaro Agha, who claims that his one hundred and fifty years makes him the oldest man in the world, is to be honored, and, incidentally, saved from starvation by the city of Constantinople.

The aged man has been unable for the past year or two to carry on his life-long trade as hamal. The hamals are the human dairy wagons of Turkey, bent nearly double, plodding steadily along the street with a piano or bedstead or dining room table on his back.

As Zaro Agha has grown somewhat too old for this herculean occupation, he has found it difficult to supply himself with the bread and cheese of existence, for the pension which the Hamals' Union of the Association of hamals is anything but large.

Now the Prefect of Constantinople, Ermine Bey, has appointed Zaro as doorkeeper for the municipal museum. Therefore he will now have not only bread and cheese aplenty, a uniform and a warm place to sit in, but a feeling of importance befitting the dignity of his years.

## World's Richest Oil Well

**Alberta Field Compare Very Favorably With Other Oil Areas**

In comparison with the average production in other fields of the world, Alberta oil wells now producing show a high average. The Royalite well, south of Calgary, in the Turner Valley field, known as the world's richest oil well, is producing 400 barrels a day of almost pure naphtha, while wells in the Wainwright field east of Edmonton are producing from 80 to 100 barrels a day.

This compares with an average of 6.59 barrels in 288,515 wells in the United States in 1924, with an average of 55.35 in California, of 20.9 barrels in Texas, of 5.72 barrels in Oklahoma, of 4.07 in Montana Rocky Mountain area, of 41.84 in Wyoming.

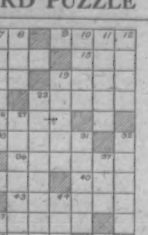
## Only Three Stamps Bore Alexandra's Image

**Quebec Tercentenary Issue of 1908 Was First One**

Only three stamps bore the image of the late Queen Dowager, notwithstanding her long connection with England. In the Newfoundland issue of 1897 the portraits of which included the four generations of the Royal Family, Queen Alexandra appeared on the three-cent orange, a finely executed stamp. In the Canadian issue of the same colony she was portrayed on the green ten-cent stamp. In the Quebec tercentenary issue of 1908 she shares the two-cent carmine stamp with King Edward, but it is the finest of her three philatelic portrayals.

A process for rolling metal foils so thin that they are transparent yet retain their elasticity has been invented by a German scientist.

## OUR CROSSWORD PUZZLE



**Horizontal**

1—Heavenly body.
4—Kind of tree.
9—Actual money.
12—Unctuous fluid.
14—Some way.
15—Fishes' eggs.
16—Girl's name.
18—Magician.
19—Relate.
20—Nuisances.
22—Bow-the head.
23—A Hollandish flat-bottomed boat.
24—Pig's fat.
26—One of the Great Lakes.
29—Peels.
30—Women.
32—Failure.
34—Neatly.
37—Id.
39—A lid-like organ (bio.).
40—Weapon.
41—Make possible.
43—Blue dye.
45—Part of the body between lower rib and hip-bone (pl.).
47—Till.
48—Instant (abbr.).
50—One of the furs.
52—To wire.
54—Emmet.
56—Fastens tightly.
58—Exclamation of despair.
60—Mouth of a kettle.
62—Sill in a box.
63—To spoil.
64—Tinted.
65—Unit.
66—Man's nickname.
67—A plant.
68—Appear.

**Vertical**

1—Walk.
2—Domesticated.
3—Weapons.
4—Timber.
5—Adds to.
6—City in Nevada.
7—Scolded.
8—Farming implement.
10—Superficial contents.
11—Pertaining to the heavenly bodies.
12—Steering apparatus.
17—Collection of maps.
19—Up a tree.
21—Flesh-colored.
23—The pepper plant.
25—Opens again.
27—Rope used as rungs of ship's ladder.
28—Many times.
29—Pertaining to the pope.
31—A seal (arch.).
33—An ecclesiastical council.
34—Product of electrolysis.
35—Wrath.
37—To drag.
42—Cooks.
44—Kate.
46—Male factor.
47—Upset.
49—Its leaf lettuce.
51—Solitary.
53—Plant.
55—Poet.
56—Twelve o'clock.
57—A plant.
58—Stalk of a plant.
60—Distress signal.
61—A beverage.

## Explains Stand Of Canada

**Hon. P. C. Larkin Issues Statement Regarding Pacific Cable Dispute**

Canada's partnership has cost her close to £1,000,000 as her share of deficits when the cable was run at a loss, and she now desires to share in the proceeds of the now profitable undertaking, says a statement issued from the office of the Canadian high commissioner, Hon. P. C. Larkin, with reference to the dispute over proposed duplication of the cable from Fiji to Canada. Postmaster-General Hon. Charles Murphy has stated that if the duplication is proceeded with Canada will withdraw from the partnership with the United Kingdom, Australia and New Zealand under which the Pacific cable was constructed.

The statement recalls that the British Act of 1911 provides that any profits from the cable should be divided between the Imperial and Dominion Governments in the same proportion as any losses. For the first thirteen years, losses were $2,466,000 of which Canada paid nearly five-eighteenths.

"We claim," the statement continues, "that the Pacific cable board has no authority to proceed with duplication of the Pacific cable without our consent, doing so will violate the British Act of 1911. It is for these reasons, among others, that the Canadian postmaster-general has notified the board that in view of these unfavorable conditions the board has no authority to proceed with the duplication of the cable unless prompt provision is made for Canada's retirement from partnership therein."

## A World's Record

**Death Rate is Very Low in British Columbia Coal Mining Industry**

Due to care and safety devices, a world's record was scored by the coal mines of British Columbia in 1925 in the matter of fatalities in this industry, according to figures announced by the minister of mines. The death rate per 1,000,000 tons of coal mined was but 2.4 per cent., a figure not only the lowest in the history of the coal mining industry of the province, but a world's record as shown by a comparison with statistics compiled in all other large coal producing areas throughout the world.

**Double Bodyguard For Prince**

The personal bodyguard of the Prince of Wales has been doubled, and now consists of six picked men.

The authorities give no reasons for insuring such complete protection for the Prince, whose new guard is strong-er and more imposing than that of any other of the royal family.

The men are under instructions to remain close to the Prince at all times when he is in public.

In England 22,000 women are employed as electrical workers.

## Vaccine Against Lockjaw

**Discovery Announced in Paris by Young French Scientists**

M. Zoeller, of Val de Grace, and M. Ramon, of Paris, young French scientists who have already discovered a vaccination against diphtheria, announced to a meeting of the French Academy of Medicine that they have perfected a method of vaccination against lockjaw which can be applied at the same time as antidiphtheria vaccine.

The announcement was received with great enthusiasm by the academy. A member of the academy, M. Roux, who has studied the claims of the young Frenchmen, said that the new vaccine immunizes for life those who receive it. During a general discussion which followed it was stated that the anti-tetanic serum and Zoeller responded perfectly to all the tests to which they were subjected, and that their practical value is assured.

## Would Lower Duties

**Reduction in Duty On Automobiles is Believed Certain**

Conference between Liberal and Progressive members regarding the 1926 budget has been inaugurated and it is understood that already there is some agreement on some features. It is believed as practically certain that there will be a reduction in the duty on automobiles and that this will constitute the principal change in the tariff schedules.

In addition, it is learned, the Progressives have asked for reductions in other commodities, including pumps and pump pipes, lubricating oils and farm tools.

**Italian Aviator Abandons Trip**

Count Casagrande, Italian aviator, has been forced to abandon his flight from Genoa to Argentine, started on November 4. An engineer sent from Italy has found the plane too badly damaged it proceed without elaborate repairs.

The plane will be dismantled and sent to Italy.

Officers of the law can subdue the wicked; the hard part is to make the righteous behave.

# BAREE, SON OF KAZAN

by James Oliver Curwood

## A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.

"BAREE, SON OF KAZAN," a Vitagraph Picture, With Wolf, the War Dog, is an Adaptation of This Story

CHAPTER XXVIII.—Continued

Even at that distance Baree could see him grinning shakily; he saw the outstretched hand, and the voice stirred new sensations in him. It was not the Pierrot's voice. He had never loved Pierrot. Neither was it not the voice of the Wilderness. He had known only a few men, and all of them he had regarded with distrust. But this was a voice that disarmed him. It was kind in its appeal. He wanted to answer it. He was filled with a desire, all at once, to follow close at the heels of this stranger. For the first time in his life a craving for the friendship of man possessed him. He did not move until Jim Carvel entered the spruce. Then he followed.

That night they were camped in a dense growth of cedars and balsams ten miles north of Bush McTaggart's trapline. For two hours it had snowed, and their trail was covered. It was still snowing, but not a flake of the white deluge sifted down through the thick canopy of boughs. Carvel had put up his small 4x10 tent, had built a fire; their supper was over, and Baree lay on his belly facing the outlaw, almost within reach of his hand. With his back to a tree, Carvel was smoking luxuriously. He had thrown off his cap and his coat, and in the warm firelight he looked almost boyishly young. But even in that glow his face lost none of their ruggedness, nor his eyes their clear shortness.

"I'm a bad one, old chap," he chuckled. "You haven't got it on me—not a bit."

"I'm a bad one, old chap," he chuckled. "You haven't got it on me—not a bit."

"No, he didn't get to the penitentiary," went on Carvel, looking straight at Baree, again. "Yours truly knew what that meant, old chap. Would have been pardoned inside a year. Ah! there was my Dad, the biggest half of me, in his grave. So I just went up to that white-stripped skunk right there before the Judge's eyes, an' the eyes of all his dear relatives an' friends—and I killed him! And I got away. Was out through a window before they woke up, hit for the bush country, and have been sailing up the trails ever since. Ah! I guess God was with me, Boy. For He did a queer thing to help me out summer before last, just when the mosquitoes were after me hardest an' it looked pretty black. Risk was found drowned down in the Reindeer Country, right where they thought I was cornered; an' the good Lord made that man look so much like me that he was buried under my name. So I'm officially dead, old chap. I don't need to be afraid any more so long as I don't get too familiar with people for a year or so longer, and 'way down inside me I've liked to believe God fixed it up in that way to help me out of a bad hole. What's your opinion? Eh?"

CHAPTER XXIX.

Baree was on his feet, rigid as hewn rock, when Carvel came out of the tent, and for a few moments Carvel stood in silence, watching him closely. Would the dog respond to the call of the past? Did he belong to them? . . . Would he go—now? The wolves were drawing nearer. They were not driving, as a cariboo, but were travelling straight—dead straight for their camp. The significance of this fact was easily understood by Carvel. All that afternoon Baree's feet had left a blood-smell in their trail, and the wolves had struck the trail in the deep forest, where the falling snow had not covered it. Carvel was not alarmed. More than once in his five years of wandering between the Arctic and the Height of Land he had played the game with the wolves. Once he had almost lost, but that was out in the open Barren. To-night he had a fire, and in the event of his firewood running out he had trees he could climb. His anxiety just now was centred in Baree. So he said, making his voice quite casual:

"You aren't going, are you, old chap?"

If Baree heard him he gave no evidence of it. But Carvel, still watching him closely, saw that the hair along his spine had risen like a brush, and then he heard—growing slowly in Baree's throat—a snarl of ferocious hatred. It was the sort of snarl that had held back the Factor from Lac Bain, and Carvel, opening the breech of his gun to see that all was right, chuckled happily. Baree may have heard the chuckle. Perhaps it meant something to him, for he turned his head suddenly and, with flattened ears looked at his companion.

The wolves were silent now. Carvel knew what that meant, and he was tensely alert. In the stillness the click of the safety on his rifle sounded with metallic sharpness. For many minutes they heard nothing but the crack of the fire. Suddenly Baree's muscles seemed to snap. He sprang back, and faced the quarter behind Carvel, his head level with his shoulders, his inch-long fangs gleaming as he snarled into the black caverns of the forest beyond the rim of firelight. Carvel had turned like a shot.

It was almost frightening—what he saw. A pair of eyes burning with greenish fire, and then another pair, and after that so many of them that he could not have counted them. He gave a sudden gasp. They were like cat-eyes, only much larger. Some of them, catching the firelight fully, were red as coals, others flashed blue and green—living things without bodies. With a swift glance he took in the black circle of the forest. They were out there, too; they were on all sides of them, but where he had seen them first they were thickest. In those first few seconds he had forgotten Baree, awed almost to stupefaction by that monster-eyed ravelin of death that hemmed them in. There were fifty—perhaps a hundred wolves out there, afraid of nothing in all this savage world but fire. They had come up without the sound of a pad-fed foot or a broken twig. If it had been night, and they had been asleep, and the fire out—

He shuddered, and for a moment the thought got the better of his nerves. He had not intended to shoot except from necessity, but all at once his rifle came to his shoulder and he sent a stream of fire out where the eyes were thickest. Baree knew what the shots meant, and filled with a fierce desire to get at the throat of one of his enemies he dashed in their direction. Carvel gave a startled yell as he went. He saw the dash of Baree's body, saw him disappear in the gloom, and in that same instant heard the deadly clash of fangs and the impact of bodies. A wild thrill shot through him. The dog had charged alone—and the wolves had waited. Three could be but one end. His four-footed comrade had gone straight into the jaws of death!

(To be continued)

Minard's Liniment for frost-bites

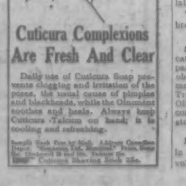
### Should Be Good Risk

Old Uncle Ellis Jones went into a life insurance office and requested a policy.

"Why, uncle," said the president, "you are too old for us to take the risk. How old are you?"

"Ninety-seven come next August," said the old man, and added testily: "If you folks will take the trouble to look up your statistics, you'll find that mighty few men die after they're ninety-seven."

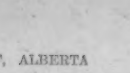
A process of making leaves cloth from nitrogenous tea has been patented at Budapest, Hungary.



**Cuticura Complexions Are Fresh And Clear**

Daily use of Cuticura Soap prevents clogging and irritation of the pores, the usual cause of pimples and blackheads, while the Ointment soothes and heals. Always keep Cuticura Talcum on hand; it is refreshing and refreshing.

Soap 25c. Ointment 25 and 50c. Talcum 25c.



**INECTO RAPID**

The world's best hair tint. Will restore any hair to its natural color in 15 minutes. Small size $3.50 by mail. Double size $5.50 by mail

## Famous Polar Ship In H. B. Service

### Amundsen's "Maude" Will Ply As Tender In Canadian Waters

Captain Amundsen's famous polar exploration ship "Maude," from now on will ply Canadian waters, and will possibly be seen next summer by some of the Edmonton fur traders who make the annual pilgrimage to the Arctic coast.

On her return from the fruitless effort to drift with the ice to Europe via the Siberian coasts and the northeast passage, the "Maude" was sent to Seattle, where the ice pioneer was purchased by the Hudson's Bay Company.

With the coming of the spring the vessel will be sent north via the Behring Straits. Once in Canadian Arctic waters she will be used as a tender in connection with the company's large ocean-going steamer "Bayshimo." It is understood that the latter will not go further than Herschel Island, due to the danger of being caught in the ice packs. She will unload her cargo there for the many new H. B. C. posts recently established in the Arctic, the "Maude" transferring the cargo to its various destinations.

**Joint Stiffness Goes, Swellings Disappear, Pain Is Subdued**

No Liniment Gives Such Universal Satisfaction As

NERVILINE

It is the great penetrating power of Nerviline that makes it so efficient in overcoming stiffness and inflammation. It rubs into the very core of the pain, penetrates quickly through the tissues, and brings a warm, comforting relief at once. No liniment relieves so pain relieving power with Nerviline. For the minor pains and ills that arise in every family, Nerviline should always be kept handy on the shelf. Use it for Rheumatism, Lumbago, Neuralgia and Colds. 35 cents at all dealers.

The average railroad tie, in its natural state, lasts about seven and one-half years. If treated with preservative, about 15 years.

**She Could Never Do The Things Other Girls Did**

Miss J. J. Ross, Scollard, Alta., writes:—"I am only twenty years old, but have suffered from heart palpitation and nerve trouble for several years.

"I could never do the things other girls did, that is, in the line of sports, skating, etc., and could never depend on myself at work.

"About six months ago I began taking

and am just twice the girl I was, and can enjoy everything in general life as much as any. I am very grateful for what your Pills have done for me."

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

### Can Use Waste Hops

The discovery has just been announced by British chemists of a microbe whereby 10,000 tons of waste hops can be made annually into 500,000,000 gallons of alcohol that may be used as motive power.

Disposal of waste hops formerly cost British brewers large sums every year.

"A lot of china is getting chipped lately, Mary."

"Can't be mum, when I breaks, I breaks things proper."

Stop the Cough—Coughing is caused by irritation in the respiratory passages and is the effort to dislodge obstructions that come from inflammation of the mucous membrane. Treatment with Dr. Thomas' Eclectric Oil will allay the inflammation and in consequence the cough will usually stop. Try it and you will be satisfied.

Policewomen and police matrons in Los Angeles must be trained revolver shots.

## Minerals In B.C.

The mineral production of the Dominion for last year is estimated at $288,500,000, an increase of about $100,000,000 over the previous year. Of this increase, British Columbia accounts for about $14,000,000, or seventeen of the whole. This province accounted for a seventh of the gold, nearly half the silver, two-thirds of the copper and nearly all the lead and zinc.

**FIGHTING FOR BABY'S HEALTH**

**Is the Constant Care of Every Young Mother**

The young mother has a constant care in looking after the welfare of her little ones. Childhood ailments come on so suddenly—sometimes without a minute's warning—the mother may have a very sick baby on her hands before help can be obtained. That is unless she has a remedy in the house which she can safely give the baby for any of the many minor ailments of childhood and childhood.

Such a remedy is found in Baby's Own Tablets. Thousands of mothers throughout the country always keep a box of the Tablets on hand and they proclaim them to be without an equal for sweetening baby's stomach; regulating his bowels, and thus driving out constipation and indigestion, colds and simple fevers, and making the dreaded teething period easy.

Baby's Own Tablets are an absolutely safe remedy. They are guaranteed to be free from opiates or any other harmful drug which are so harmful to the future welfare of the baby. Mothers, if you value the life of your little ones give him Baby's Own Tablets when he is ill, or, better still, give him an occasional dose of the Tablets to ward off illness. The Tablets are sold by medicine dealers or will be sent by mail, at 25 cents a box by addressing The Dr. Williams' Medicine Co., Brockville, Ont.

## Extract Helium From Air

### Is Claim of British Oxygen Company At North Wembley

One more of the great secrets of nature has been successfully probed by British chemists and applied by a British firm. For the first time—except, perhaps, in the laboratory of men like Sir William Ramsay—the British Oxygen Company, at their works at North Wembley, claims to have extracted pure helium from the air. The company has employed a power engine, with a flywheel of huge dimensions, sucking in the atmosphere, which is afterwards separated into its various gases. Helium is regarded as the one non-inflammable gas available for the inflation of airships. It is said that one might place a light man with a volume of it and the flame would be extinguished.

All mothers can put away anxiety regarding their suffering children when they have Mother Graves' Worm Exterminator to give relief. Its effects are sure and lasting.

**Little Helps For This Week**

While they are yet speaking I will hear.—Isa. lxv., 24.

Every inward aspiration
Is God's angel knocking,
And for every, "O, my Father!"
Slumbers deep's "Here, my child."
If we use the name of God, is this not God's gracious benediction to us? No need, then, of being "Great" to share that aspiration and that presence. The smallest roadside pool has its water from heaven and its gleam from the sun, and can hold the stars in its bosom as well as the great ocean. Even so the humblest man or woman can live splendidly. That is the royal truth that we need to learn, and I who have no mission, and no great sphere to move in.—William Channing Gannett.

Persistent Asthma. A most distressing characteristic of this debilitating disease is the persistence with which it clings. It takes root to any and every strength and leave the sufferer in a state of almost continual exhaustion. Only such a remedy can be taken that that of keeping at hand a supply of Dr. J. D. Kellogg's Asthma Remedy, famous as the most potent remedy for eradicating the disease from the tender air passages.

### When Duke of York Refused

The Duke of York proved his courage in the hunting fields of Africa, but he backed away when urged to try his hand at washing one of his father's shirts. The King's second son was on a tour of inspection through the laundry, which handles the linens of the royal family, when the invitation came.

Smilingly declining, he said: "I might burn one of His Majesty's shirts and get into trouble over it."

There is a sort of perpetual motion arrangement for making yesterday's out of tomorrows.

Whitewashing a man's character doesn't wash it white.

Minard's Liniment relieves headache

**AFTER ALL There's Nothing To Equal Zam-Buk FOR THE SKIN!**

## Says Man Like A Bicycle

### Keeps Running As Long As He Stays Active

Congratulated by a London Evening News man on reaching his 81st year, Lord Phillimore said his secret of long life, health and happiness lay in hard work, plenty of fresh air and domestic happiness.

"As long as a bicycle keeps running," he said, "it stays upright. It is the same in human life. To live long one must keep active. Idleness is fatal."

**Its Quality Sells It.**—The fact that so many thousands of intelligent people continue to use Dr. Thomas' Eclectric Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has grown steadily in public favor, owing entirely to its manifold usefulness in relieving and healing sickness. As a specific for cuts, burns, scalds and various inflammatory pains its record is beyond reproach.

Wife.—The maid has sharp ears.

Husband.—Yes, I noticed the doors are all scratched around the keyholes.

Some persons are born poor, some achieve poverty and some thrust poverty upon others.

Don't tell all you know; keep a little for seed.

**ACCIDENTS** Will happen. Be prepared for every hurt. Keep a bottle of Minard's handy.

**MINARD'S "KING OF PAIN" LINIMENT**

**Mother's Coughs and Colds Go Quickly**

She cannot afford to be sick and neglect her household duties. At the first symptoms she prepares the way for quick recovery by the immediate use of Gray's Syrup—a household remedy of many years standing.

## Here and There

Salmon exports from British Columbia amounted to 1,671,000 cases, the record for several years past. Shipments in 1924 were 1,535,000 cases; 929,000 cases in 1923; 794,000 cases in 1922 and 939,000 cases in 1921.

For the first time in Canada, a sport known as the "mountain glissade," was performed at Revelstoke, B.C., on Friday, January 29, before hundreds of visitors to the start of Revelstoke's twelfth winter carnival. "Glissading" consists of flying down rough uneven mountain sides on skis.

From August 1, 1925, to January 31, 1926, 3,182,198 bushels, or about one and a half per cent. of the 195,637,113 bushels of grain shipped by the Canadian Pacific Railway went by the all-rail route. About one-eighth, or 30,216,134 bushels travelled through the port of Vancouver and the balance of 85 per cent was shipped via Fort William.

Five hundred Montreal school children will give a concert on the concluding night of the triennial conference of the National Council of Education, to be held in Montreal from April 5 to 9. The speaker for the occasion will be Sir Walford Davies, well known authority on national and school music.

Under the auspices of the French Government, the French universities and Hon. Philippe Roy, commissioner-general of Canada in France, a tour through France has been arranged for this summer, starting in Quebec on May 26 with the departure of the Canadian Pacific liner Empress of Scotland.

Pulp and paper exports from Canada during 1925 were valued at $154,555,951, as compared with $139,491,469 for the previous year. Newsprint production for 1925 was estimated at 1,516,000 tons, as compared with 1,352,994 tons for 1924. This is twice the newsprint production of 1918.

With glorious weather prevailing, a large gathering witnessed the opening of the tenth annual Banff Winter Carnival on February 3. "Queen Gabrielle" regally entered in a fairy ring gorgeously formed by frost crystalling ice, drawn by a team of huskies. Shooting, skiing, skating, hockey and hikes featured the big winter sport tournaments.

Two more cases of automobiles crashing through gates at level crossings at Chelsea Road, Hull, Quebec, have been reported. On January 5, an automobile bus, laden with passengers, was driven through both gates. The driver explained that his windshield was frozen. The second case occurred February 3 when a car was past just as the gates were being lowered. Both cars were damaged.

Addressing the members of the Canadian Lumbermen's Association at their eighth annual convention banquet at Montreal recently, E. W. Beatty, K.C., President of the Canadian Pacific Railway, stated that the 1925 income tax would collect from $42,000,000 to $45,000,000. Mr. Beatty declared that a reduction of 2b per cent. or $11,000,000 might be brought about if the government expenses were cut. The Canadian Pacific Railway had reduced its expenses by over double that amount in one year, and the railway company was not as large as the Dominion of Canada.
